In Trying Leviathan D Graham Burnett recovers the strange story of Maurice v Judd an 1818 trial that pitted the new sciences of taxonomy against the then popular and biblically sanctioned view that the whale was a fish The immediate dispute was mundane whether whale oil was fish oil and therefore subject to state inspection But the trial fueled a sensational public debate in which nothing less than the order of nature and how we know it was at stake Burnett vividly recreates the trial during which a parade of experts pea coated whalemens pompous philosophers Jacobin lawyers took the witness stand brandishing books drawings and anatomical reports and telling tall tales from whaling voyages Falling in the middle of the century between Linnaeus and Darwin the trial dramatized a revolutionary period that saw radical transformations in the understanding of the natural world Out went comfortable biblical categories and in came new sorting methods based on the minutiae of interior anatomy and louché details about the sexual behaviors of God s creatures When leviathan breached in New York in 1818 this strange beast churned both the natural and social orders and not everyone would survive      *Modern Text Book of Zoology: Invertebrates* Prof. R.L.Kotpal,2012      **American Food and Game Fishes**
