as the figure ground reversal in Gestalt psychology Lacan's theory of the mirror stage formation of the Ego and even the self recursive structure of the aphorism and the joke Juxtaposing Wittgenstein's and Leibniz's philosophy with Melanesian social logic Wagner explores the cosmological dimensions of the ways in which different societies develop models of self and the subject object distinction The result is a philosophical tour de force by one of anthropology's greatest mavericks **Bulletin of the Atomic Scientists**, 1966-10 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world *Robert Brandom's Normative Inferentialism* Giacomo Turbanti, 2017-09-21 The philosophy of language of Robert Brandom is based on a theoretical structure composed of three main elements the normative analysis of linguistic practices the inferential characterization of conceptual contents and the expressive articulation of the relations between the former two Normative pragmatics aims to explain how linguistic practices are sufficient to confer contentful states in those who engage in them Inferential semantics provides a theory of such pragmatic significances in terms of the inferential relations that articulate conceptual contents Rational expressivism is the thesis that concept application is essentially a process of turning something that can only be done into something that can also be said Such a threefold structure is the core of normative inferentialism This book is a concise self contained and comprehensive presentation of this philosophical enterprise It guides the reader through the analysis of Brandom's imposing theoretical apparatus the discovery of the roots of his approach in American pragmatism and German idealism till the exploration of some of its most interesting and recent outcomes in pragmatics and semantics It is a valuable resource for both those who approach Brandom's work for the first time and those who are interested in the potential of normative inferentialism **Bulletin of the Atomic Scientists**, 1969-10 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world
