The Handbook of Lexical Functional Grammar Mary Dalrymple, 2023-12-14 Lexical Functional Grammar (LFG) is a nontransformational theory of linguistic structure first developed in the 1970s by Joan Bresnan and Ronald M. Kaplan, which assumes that language is best described and modeled by parallel structures representing different facets of linguistic organization and information related by means of functional correspondences. This volume has five parts: Part I Overview and Introduction provides an introduction to core syntactic concepts and representations; Part II Grammatical Phenomena reviews LFG work on a range of grammatical phenomena or constructions; Part III Grammatical modules and interfaces provides an overview of LFG work on semantics, argument structure, prosody, information structure and morphology; Part IV Linguistic disciplines reviews LFG work in the disciplines of historical linguistics, learnability, psycholinguistics and second language learning; Part V Formal and computational issues and applications provides an overview of computational and formal properties of the theory, implementations and computational work on parsing, translation, grammar induction and treebanks; Part VI Language families and regions reviews LFG work on languages spoken in particular geographical areas or in particular language families. The final section Comparing LFG with other linguistic theories discusses LFG work in relation to other theoretical approaches.

Contributions to Morphology and Syntax Stephan Kessler, Arturas Judzientis, 2015-11-02 These conference proceedings present fourteen contributions to the Baltic languages, i.e. Latvian and Lithuanian. Their temporal horizon is both modern and historical: the present-day matters of word formation as well as mistaking agreements are complemented by synchronic investigations of the syntactic usage of cases, conjunctions and verb categories; nevertheless, word origins, the development of inflections and the processes of depalatalisation have been researched by a diachronic approach.

The Begak (Ida'an) Language of Sabah Nelleke Elisabeth Goudswaard, 2005

A grammar of Vamale Jean Rohleder, 2024-10-29 Vamale is an endangered South Oceanic Northern New Caledonian language spoken by around 180 people on the northeastern coast of Grande Terre. This grammar was written as a PhD dissertation on the basis of 11 months of fieldwork funded by ELDP. The data consists both of elicitation and relatively free interviews as well as recordings of ceremonial speeches and casual conversations. ELAR contains open access archive of all recordings and a dictionary as well as a FLEX database in which many examples can be found in context. The appendix includes three texts: an oral history account of the 1917 colonial war, a traditional fable and a longer modern retelling of a legend. The grammar intends to give a general overview of Vamale to a general linguistics audience. Its focus on

syntax and comparison with related languages should particularly interest Oceanists and areal typologists With a dedicated chapter on the community's history and cultural information throughout the book this account hopes to show the beauty and wealth of both the Vamale language and culture

Processability Approaches to Second Language Development and Second Language Learning Jörg-U. Keßler, 2009-03-26 A fundamental issue in second language acquisition research and in applied linguistics is the question of how learners acquire a second language Today it is general knowledge that any second language learning follows certain theoretically established and empirically supported developmental sequences Based on Processability Theory Pienemann 1998 and 2005 one can diagnose current states of individual learners second language development Knowing about the path of second language development provides important insights into what learners are ready to acquire in the second language at a given point in time This can support second language learning both in natural and instructional settings Pienemann's Processability Theory PT provides a well researched and empirically substantiated framework to explain the developmental sequences in second language learning across languages Taking Pienemann 1998 and 2005 as the point of departure the chapters of this book apply test and extend PT The book is organised in four parts I Introduction II Current Theoretical Issues within the PT Framework III Applying PT to the Second Language Classroom and IV Work in Progress within the PT Framework

Translation Technique and Literary Structures in Greek Isaiah 13:1-14:23 Matthew J. Albanese, 2025-10-04 Matthew J Albanese explores the translation techniques behind the Greek version of Isaiah 13:1-14:23 offering fresh insights into how the translator rendered the Hebrew text Through a detailed analysis of style structure and linguistic choices this book reveals how the translator's decisions were deeply rooted in the Hebrew text shedding new light on the artistry of biblical interpretation and translation in ancient Judaism The work also examines how certain divergences and shifts in Hebrew to Greek clause structure semantics and lexical misunderstanding influenced the formation of Greek Isaiah The work advances Greek Isaiah research by highlighting the translator's awareness and appropriation of features from larger thematic and structural portions of Hebrew Isaiah 13:1-14:23

Antipassive Katarzyna Janic, Alena Witzlack-Makarevich, 2021-03-15 This book provides a comprehensive treatment of the morpho syntactic and semantic aspects of the antipassive construction from synchronic diachronic and typological perspectives The nineteen contributions assembled in this volume address a wide range of aspects pertinent to the antipassive construction such as lexical semantics the properties of the antipassive markers as well as the issue of fuzzy boundaries between the antipassive construction and a range of other formally and functionally similar constructions in genealogically and areally diverse languages Purely synchronically oriented case studies are supplemented by contributions that shed light on the diachronic development of the antipassive construction and the antipassive markers The book should be of central interest to many scholars in particular to those working in the field of language typology semantics syntax and historical linguistics as well as to specialists of the language families discussed in the individual contributions
