changes the way other researchers in a domain think about the world and go about their business Due to its positive impacts transformative research can be regarded as inherently having greater value than more conventional research and funding agencies clearly regard transformative research as something to be encouraged and funded through special programs Assessments of transformative research funding initiatives are few and provide a mixed picture of their effectiveness The challenge is whether transformative research can be identified at the time it is proposed rather than after it has been conducted communicated and its influence on the discipline has become clear *Fostering Transformative Research in the Geographical Sciences* reviews how transformative research has emerged in the past what its early markers were and makes recommendations for how it can be nurtured in the future **The Dictionary of Physical Geography** David S.
