Education and Teacher Education in the Modern World P. Calogiannakis, K.G. Karras, C.C. Wolhuter, 2015-11-25 This book discusses current problems and policies approaches trends and recruitment conditions within the education of teachers in the modern world It investigates new research within this area and explores various aspects prevalent in teachers and in their own and general education today The contributions to this volume approach the topic of modern teachers from various geographical and contextual perspectives discussing the challenges facing teachers from educational cultural socio political demographic and economic points of view *Language Teaching Research and Language Pedagogy* Rod Ellis, 2012-03-27 This book examines current research centered on the second language classroom and the implications of this research for both the teaching and learning of foreign languages It offers illuminating insights into the important relationship between research and teaching and the inherent complexities of the teaching and learning of foreign languages in classroom settings Offers an accessible overview of a range of research on instruction and learning in the L2 classroom Bridges the relationship between research teachers and learners Helps evolve the practice of dedicated current language teachers with research findings that suggest best practices for language teaching **Discursive Psychology** Cristian Tileagă, Elizabeth Stokoe, 2015-08-27 Discursive Psychology is the first collection to systematically and critically appraise the influence and development of its foundational studies exploring central concepts in social psychology such as attitudes gender cognition memory prejudice and ideology The book explores how discursive psychology has accommodated and responded to assumptions contained in classic studies discussing what can still be gained from a dialogue with these inquiries and which epistemological and methodological debates are still running or are worth reviving International contributors look back at the original ideas in the classic papers and consider the impact on and trajectory of subsequent work Each chapter locates a foundational paper in its academic context identifying the concerns that motivated the author and the particular perspective that informed their thinking The contributors go on to identify the main empirical theoretical or methodological contribution of the paper and its impact on consequent work in discursive psychology including the contributors own work Each chapter concludes with a critical consideration of how discursive psychology can continue to develop This book is a timely contribution to the advance of discursive psychology by fostering critical perspectives upon its intellectual and empirical agenda It will appeal to those working in the area of discursive psychology discourse analysis and social interaction including researchers social psychologists and students Neuroscience-based Cognitive Therapy Tullio Scrimali, 2012-04-23 A pioneer of CBT explores recent advances in neuroscience showing how they can be applied in practice to improve the effectiveness of cognitive therapy for clients with a wide range of diagnoses including mood disorders anxiety disorders eating disorders and schizophrenia Utilizes the latest advances in neuroscience to introduce tools that allow clinicians for the first time to directly measure the effectiveness of cognitive therapy interventions Rigorously based in neuroscientific

research yet designed to be readable and jargon free for a professional market of CBT practitioners Covers theory assessment and the treatment of a wide range of specific disorders including anxiety disorders mood disorders eating disorders addictions and schizophrenia Written by a respected pioneer in the field **A Drive to Survive** Kathryn Nave,2025-02-04 How the purposive behavior of living systems outstrips the constraints of the free energy principle Since 2005 Karl Friston's proposal that the principle of free energy minimization underpins the purposive behavior of living agents has evolved through thousands of publications This principle's central move is to formalize the drive for self preservation in terms of a single probabilistic imperative to survive a living system must consistently exhibit the same most likely pattern of activity over time Despite the simplicity of this central claim the free energy principle's complexity and rate of development have previously made it difficult to identify and evaluate In *A Drive to Survive* Kathryn Nave offers an extended critical analysis of the strengths and limitations of Friston's proposal Nave shows that the free energy principle's capacity to account for the biological origins of purposiveness is undermined by its applicability to any stable inanimate system As this triviality has become apparent so advocates have begun to reframe the free energy principle as a means to eliminate rather than explain the notion of distinctively biological purposiveness This Nave proposes gets things the wrong way around The triviality of free energy minimization does not prove that there is no difference in kind between living agents and ordinary machines but rather it reflects that the framework cannot capture the intrinsic instability and unpredictability that distinguish the former **Psychology at the Movies** Skip Dine Young,2012-03-14 *Psychology at the Movies* explores the insights to be gained by applying various psychological lenses to popular films including cinematic depictions of human behavior the psychology of filmmakers and the impact of viewing movies Uses the widest range of psychological approaches to explore movies the people who make them and the people who watch them Written in an accessible style with vivid examples from a diverse group of popular films such as *The Silence of the Lambs* *The Wizard of Oz* *Star Wars* *Taxi Driver* *Good Will Hunting* and *A Beautiful Mind* Brings together psychology film studies mass communication and cultural studies to provide an interdisciplinary perspective Features an extensive bibliography for further exploration of various research fields

Brain-Mind-Body Practice and Health Yi-Yuan Tang,2018-01-09 It is acknowledged that practice could induce rapid change or reorganization of the brain's cellular or neural networks as well as behaviors Notably practice relevant to mental or physical approach attracted great attention in this decade It highlights profound significance both for human evolution and individual development Specifically acquiring fine motor skills is a crucial premise for human being to evolve to modern human by using tools in one side In the other side numerous evidences indicated that motor learning involved in limb and trunks promotes the development of individual brain in anatomy and functions Hence motor learning is also tightly associated with developmental plasticity These studies on brain mind body practice illuminate a promising way in promoting human brain health This editorial covers wide range of brain mind body practice forms to summarize recent new findings and

development from behavioral physiological neurobiological and psychological science approaches In this research topic we addressed recent findings from theoretical as well as experimental perspective including contributions under the following three headings 1 intervention studies to investigate the positive effect of brain mind body practice on cognition and relevant brain mechanism The intervention pattern consisted of short term practice ranging from few hours to several weeks 2 cross sectional studies using expert novice paradigm to explore the behavioral and neural system change induced by extensive brain mind body practice 3 the mediators influence the relationship between practice and health outcomes and 4 new viewpoints on brain mind body practice from theoretical perspectives Here we briefly highlight these articles aiming to provide a deep understanding for the association between practice plasticity and health for readers Additionally it offers new insights for developing possible practice interventions for clinical treatment of neurological dysfunction or disorders
