Question Answering for the Curated Web Rishiraj Saha Roy, Avishek Anand, 2022-05-31 Question answering QA systems on the Web try to provide crisp answers to information needs posed in natural language replacing the traditional ranked list of documents QA posing a multitude of research challenges has emerged as one of the most actively investigated topics in information retrieval natural language processing and the artificial intelligence communities today The flip side of such diverse and active interest is that publications are highly fragmented across several venues in the above communities making it very difficult for new entrants to the field to get a good overview of the topic Through this book we make an attempt towards mitigating the above problem by providing an overview of the state of the art in question answering We cover the twin paradigms of curated Web sources used in QA tasks trusted text collections like Wikipedia and objective information distilled into large scale knowledge bases We discuss distinct methodologies that have been applied to solve the QA problem in both these paradigms using instantiations of recent systems for illustration We begin with an overview of the problem setup and evaluation cover notable sub topics like open domain multi hop and conversational QA in depth and conclude with key insights and emerging topics We believe that this resource is a valuable contribution towards a unified view on QA helping graduate students and researchers planning to work on this topic in the near future

Spiritualism Answered by Science Edward William COX (Serjeant-at-Law.), 1872 Science as a Questioning Process: N Sanitt, 1996-01-01 Science as a Questioning Process is a general philosophy of science book aimed at a wide audience interested in science philosophy and social science The book views science as a questioning process From this novel perspective the author then evaluates theories in terms of a trade off between empirical questions resolved and theoretical questions left unresolved He discusses questions of perennial intellectual and public concern about what science tells us and how reliable it is *The Answers Lie Within Us* Alistair Sinclair, 2017-07-05 This book suggests that religion in its usual sense can be replaced by something better that the human spirit or subjectivity can be the subject of scientific study and that lack of purpose or design in the universe is not a handicap but a positive opportunity for intelligent beings to make of the universe and its contents what they reasonably can The book breaks new ground in suggesting a radical alternative to religion It offers a scientific and humanist alternative to religion which appeals to people's critical faculties rather than emotions or intuitions It also challenges current views of causation and the principle of sufficient reason by stressing the subjectivity of our reasoning powers and clarifying these in relation to an independent external reality It develops and elaborates a notion of the noosphere within a theoretical system this enables the notion to assume a scientific importance which it currently lacks because it is treated as an isolated
