Ecotoxicology Modeling James Devillers, 2009-08-07 Ecotoxicology Modeling is a comprehensive and well documented text providing a collection of computational methods to the ecotoxicologists primarily interested in the study of

the adverse effects of chemicals their mechanisms of action and or their environmental fate and behavior Avoiding mathematical jargon the book presents numerous case studies to enable the reader to understand the interest but also the limitations of linear and nonlinear models in ecotoxicology Written by an international team of scientists Ecotoxicology Modeling is of primary interest to those whose research or professional activity is directly concerned with the development and application of models in ecotoxicology It is also intended to provide the graduate and post graduate students with a clear and accessible text covering the main types of modeling approaches used in environmental sciences **Wetland**

Management and Sustainable Livelihoods in Africa Adrian Wood, Alan Dixon, Matthew McCartney, 2013-06-19 In this book the authors argue for a paradigm shift in the way African wetlands are considered Current policies and wetland management are too frequently underpinned by a perspective that views agriculture simply as a threat and disregards its important contribution to livelihoods In rural areas where people are entrenched in poverty wetlands in particular wetland agriculture have a critical role to play in supporting and developing peoples livelihoods Furthermore as populations rise and climate change takes grip they will be increasingly important The authors argue that an approach to wetland management that is much more people focused is required That is an approach that instead of being concerned primarily with environmental outcomes is centred on livelihood outcomes supported by the sustainable use of natural wetland resources The authors stress the need for Integrated Water Resource Management and landscape approaches to ensure sustainable use of wetlands throughout a river catchment and the need for wetland management interventions to engage with a wide range of stakeholders They also assess the feasibility of creating incentives and value in wetlands to support sustainable use Drawing on nine empirical case studies this book highlights the different ways in which sustainable use of wetlands has been sought each case focusing on specific issues about wetlands agriculture and livelihoods *Princeton Review AP*
