Thumps - Reviews and Essays 2016 Manuel Augusto Antão, 2018-03-13 Book Reviews and Essays Comprises everything I wrote on my blog over 2016 The Expanding Worlds of General Relativity Hubert Goenner, Jürgen Renn, Jim Ritter, Tilman Sauer, 1998-12-01 The past decade has seen a considerable surge of interest in historical and philosophical studies of gravitation and relativity due not only to the tremendous amount of world wide research in general relativity and its theoretical and observational consequences but also to an increasing awareness that a collaboration between working scientists historians and philosophers of science is in this field particularly promising for all participants The expanding activity in this field is well documented by recent volumes in this Einstein Studies series on the History of General Relativity as well as by a series of international conferences on this topic at Osgood Hill 1986 Luminy 1988 and Pittsburgh 1991 The fourth of these conferences hosted by the Max Planck Institute for the History of Science was held in Berlin from 31 July to 3 August 1995 with a record attendance of some 80 historians and philosophers of science physicists mathematicians and astronomers Based on presentations at the Berlin conference this volume provides an overview of the present state of research in this field documenting not only the increasing scope of recent investigations in the history of relativity and gravitation but also the emergence of several key issues that will probably remain at the focus of debate in the near future RELATIVITY IN THE MAKING The papers of this section deal with the origins and genesis of relativity theory System of Positive Polity: Social dynamics; or, the general theory of human progress Auguste Comte, 1876 Migrant Frontiers Anna Tybinko, Lamonte Aidoo, Daniel F. on the geo political limits of Peninsular space several essays interrogate the legacies of Iberian colonial projects in a global perspective and how the discursive underpinnings of these impact the politics of migration in the broader Luso Hispanic world Studies in the History of General Relativity Jean Eisenstaedt,A.J. Kox,1992-02-07 Among the considerations of the two dozen papers are the reception and development of Einstein s theory of general relativity in various institutions around the world conceptual issues of the theory especially themes concepts and principles associated with his theory of gravity a number of tech
