A Line Crossed The Line Trilogy English Edition:

Crossing the Lines Melvyn Bragg, 2005 A series of people find their fates intertwined from a teenager's seduction by the outside world to his romance with a girl whose life is precariously balanced to the struggles of his middle aged parents

Across the Lines Michael Cronin, 2000 Across the Lines is a study of how language mediates experience across cultures with regard to travel The study is partly based on the books of various travel writers with no grasp of a foreign tongue their perceptions using interpreters guides

Across the Lines, 2022-05-16 This third volume of ASNEL Papers covers a wide range of theoretical and thematic approaches to the subject of intertextuality Intertextual relations between oral and written versions of literature text and performance as well as problems emerging from media transitions regionally instructed forms of intertextuality and the works of individual authors are equally dealt with Intertextuality as both a creative and a critical practice frequently exposes the essential arbitrariness of literary and cultural manifestations that have become canonized The transformation and transfer of meanings which accompanies any crossing between texts rests not least on the nature of the artistic corpus embodied in the general framework of historically and socially determined cultural traditions Traditions however result from selective forms of perception they are as much inventions as they are based on exclusion Intertextuality leads to a constant reinforcement of tradition while at the same time intertextual relations between the new literatures and other English language literatures are all too obvious Despite the inevitable impact of tradition the new literatures tend to employ a dynamic reading of culture which fosters social process and transition thus promoting transcultural rather than intercultural modes of communication Writing and reading across borders becomes a dialogue which reveals both differences and similarities More than a decolonizing form of deconstruction intertextuality is a strategy for communicating meaning across cultural boundaries

Handbook of Poetic Forms Jessica Bundschuh, Irmtraud Huber, 2025-10-06 This Handbook of Poetic Forms aims to offer historically informed approaches to a wide variety of poetic forms A particular emphasis will be on considering poetic form in dialogue with the cultural context in which it is being used as well as within the literary tradition of each form and to explore the stable as well as the historically variable affordances of each form in such contexts Hereby the focus lies on prescriptive forms that is on poetic forms which are defined by or at least associated with specific metrical stanzaic or overall structures or the absence of such rather than poetic genres that are primarily characterised by similarities in subject matter like the elegy or the ode While this Handbook should be accessible to students its aim is not to offer basic introductions but rather to broaden a historical and functional understanding of the poetic forms it covers and to engage with poetic forms not as givens but as historically contingent processes of formation Above all this Handbook's formalism is new formalist in emphasising historical awareness and contextualisation **Literature as Translation/Translation as Literature** Christopher Conti, James Gourley, 2014-03-17 Broadly conceived literature consists of aesthetic and cultural processes that can be thought of as forms of translation By the same token translation requires the sort of creative or interpretive understanding usually associated with literature Literature as Translation Translation as Literature explores a number of themes centred on this shared identity of literature and translation as creative acts of interpretation and understanding The metaphor or motif of translation is the touchstone of this volume which looks at how an expanded idea of translation sheds light not just on

features of literary composition and reception but also on modes of intercultural communication at a time when the pressures of globalization threaten local cultures with extinction The theory of ethical translation that has emerged in this context which fosters the practice of preserving the foreignness of the text at the risk of its misunderstanding bears relevance beyond current debates about world literature to the framing of contemporary social issues by dominant discourses like medicine as one contributor's study of the growing autism rights movement reveals The systematizing imperatives of translation that forcibly assimilate the foreign to the familiar like the systematizing imperatives of globalization are resisted in acts of creative understanding in which the particular or different finds sanctuary The overlooked role that the foreign word plays in the discourses that constitute subjectivity and national culture comes to light across the variegated concerns of this volume Contributions range from case studies of the emancipatory role translation has played in various historical and cultural contexts to the study of specific literary works that understand their own aesthetic processes and the interpretive and communicative processes of meaning more generally as forms of translation Several contributors including the English translators of Roberto Bolaño and Hans Blumenberg were prompted in their reflections on the creative and interpretive process of translation by their own accomplished work as translators All are animated by the conviction that translation whether regarded as the creative act of understanding of one culture by another as the agent of political and social transformation as the source of new truths in foreign linguistic environments and not just the bearer of established ones or as the limit of conceptuality outlined in the silhouette of the untranslatable is a creative cultural force of the first importance
