A Not So Humane World:

Shaping a Humane World Oliver Kozlarek, Univ. Prof. Dr. Dr.h.c.mult., Ernst Wolff, 2014-03-15 The generation of meaning is the primary precondition for acting and thinking The essays in this volume contribute to a discourse on this matter with a decentred globalized world in mind The notions civilization humanism and modernity far from being exclusively Western ideas may facilitate joint efforts of reflecting on the universality of current human conditions particularly since such reflexion is possible from particular cultural perspectives Modernity presents us with a second Axial Time in which the quest for a plural but shared humane world is the challenge *Alone in the World?* Van Huyssteen, 2006-04-12 In *Alone in the World* first given as the 2004 Gifford Lectures at the University of Edinburgh J Wentzel van Huyssteen develops the interdisciplinary dialogue that he set out in *The Shaping of Rationality* 1999 applying this methodology to the uncharted waters between theological anthropology and paleoanthropology Among other things van Huyssteen argues that scientific notions of human uniqueness help us to ground theological notions of human distinctiveness in flesh and blood embodied experiences and protect us from overly complex theological abstractions regarding the image of God Focusing on the interdisciplinary problem of human origins and distinctiveness van Huyssteen accesses the origins of the embodied human mind through the spectacular prehistoric cave paintings of western Europe fifteen of which are reproduced in color in this volume Boldly connecting the widely separated fields of Christian theology and paleoanthropology through careful interdisciplinary reflection *Alone in the World* will encourage sustained investigation into the question of human uniqueness

In Quest of Humane Development Byasdeb Dasgupta, Prasenjit Sarkhel, Archita Ghosh, Bishakha Ghosh, 2022-05-13 This book presents a multidimensional perspective on the interlinkage between human development community characteristics and public service delivery with special reference to India The chapters in the book analyze the influence of public service delivery on human development from neo classical as well as Marxian point of view Thus the expositions in the book provides a balanced mix of macro and micro approaches in the study of development The analytical discussions are supplemented by case studies and empirical estimates so as to demonstrate the applicability of the theory and the theoretical discourse about human development community network and the success and failures of critical public services in the Indian context The methodology followed in the chapters involves critical survey of existing literature case studies field survey and use of econometric techniques as well as statistical tools of index construction While contributors are primarily scholars from neo classical economics discipline some are intellectuals from the field of political economy and development studies Given the wide array of development perspectives this book is of interest not only to students and researcher of development economics social science and management but also a valuable reading for development practitioners and policy makers who would be interested in understanding how community and public institutions interact to determine access to health education and social security services that shapes the wellbeing of disadvantaged populations The lessons and implications are

extremely pertinent to other emerging economies in particular those in South Asia **Marxism and Human Nature** Sean Sayers, Global Security Great Britain. Parliament. House of Commons. Foreign Affairs Committee, 2008 This report is the fourth in a series on global security and examines the foreign policy aspects of the United Kingdom's relationship with Japan the Republic of Korea South Korea and the Democratic People's Republic of Korea North Korea The current political and economic scene in Japan and South Korea is outlined The regional relations of Japan and South Korea are then examined including those with the United States and China trade agreements and regional security forums The focus on North Korea covers the nuclear programme human rights food security regime reform and stability North South Korea relations and military matters The involvement of Japan and South Korea in international affairs is also scrutinised including climate change development assistance and the United Nations The report concludes with a review of economic and cultural relations between the UK and Japan and South Korea **The Human Origins** Valentin Matcas, 2016-04-20 There is more to the human origins development intelligence and civilization than the epic debate Creationism versus Evolution simply because there is more to the human condition than what authorities and ideologies want you to believe Therefore when you study the human origins you have to search beyond the moment when the first humans had detached from the firmament or previous species since there are other significant events in humanity's lifespan and achievement defining its specific timeline While you have to study everything otherwise you risk understanding these significant events only from simplistic empirical or ideological perspectives ending up learning what you already know while following the crowd throughout unending debates Since you want the accurate truth because you already know all theories beliefs speculations and debates regarding the human origins And this is why when you study the human origins you expect to understand everything about the origins of life the nature and origins of this world the nature of the human higher self and intelligence the origins and debut of the human consciousness and human intelligent reasoning along with all details related to the Creator of this entire world of Life and of humanity Additionally it is relevant to know how all these affect you personally and how they affect your family your genetic line and your nation how your family and genetic line originate where and how it happened under what circumstances and with what status and privileges for you for your family for your nation and for the humankind And this is exactly what we cover throughout this book in all details and from all perspectives This book studies the human origins along with the origins of life human intelligence human species human development human society human current civilization along with various past civilizations of Earth integrating humans their origins and their original and current conditions in an elaborate comprehensive model *Human Security, Changing States and Global Responses* Sangmin Bae, Makoto Maruyama, 2014-12-05 This book critically assesses the human security challenges faced by states focusing on how and to what extent the state is influenced by global structures and operations Having grown rapidly since the 1990s the field of human security has spawned a wide variety of academic research This research has helped to reconceptualize the notion of

security both broadening and deepening it and it has created a space where unconventional and multidimensional forms of security inform international policy practices. However, while various issues and cases of human security have received growing academic attention and policy interest, many of the existing books on human security focus primarily on non-state actors. This leaves a key question unanswered: why do sovereign states take on leadership roles in promoting human security? To answer the question of why and how national governments influence international human security policy, this volume examines the domestic political factors and structures that mediate the range of policy choices. Important domestic variables include the cultural match, e.g., Does the country often favor multilateralism and promote a rule-bound international society? the nature of the political interests and realities that are present, e.g., Does the country see the promotion of human security as a strategic choice? and the occurrence of important historical events such as wars, revolutions, or natural disasters, e.g., Does the country during the crisis help to foster a new way of managing enduring security threats? Using this line of analysis, the book illuminates the role of the state in handling critical human security issues and its rationale for doing so. This book will be of much interest to students of human security, peace studies, global governance, development studies, and IR in general.

Legitimizing Human Rights Angus J.L. Menage, 2016-04-22 When does the exercise of an interest constitute a human right? The contributors to Menage's edited collection offer a range of secular and religious responses to this fundamental question of the legitimacy of human rights claims. The first section evaluates the plausibility of natural and transcendent foundations for human rights. A further section explores the nature of religious freedom and the vexed question of its proper limits as it arises in the US, European, and global contexts. The final section explores the pragmatic justification of human rights: how do we motivate the recognition and enforcement of human rights in the real world? This topical book should be of interest to a range of academics from disciplines spanning law, philosophy, religion, and politics.

Moral Issues in Global Perspective - Volume 2: Human Diversity and Equality - Second Edition Christine Koggel, 2006-03-27 Now available in three thematic volumes, the second edition of *Moral Issues in Global Perspective* is a collection of the newest and best articles on current moral issues by moral and political theorists from around the globe. Each volume seeks to challenge the standard approaches to morality and moral issues shaped by Western liberal theory and to extend the inquiry beyond the context of North America. Covering a broad range of issues and arguments, this collection includes critiques of traditional liberal accounts of rights, justice, and moral values while raising questions about the treatment of disadvantaged groups within and across societies affected by globalization. Providing new perspectives on issues such as war and terrorism, reproduction, euthanasia, censorship, and the environment, each volume of *Moral Issues in Global Perspective* incorporates work by race, class, feminist, and disability theorists. *Human Diversity and Equality*, the second of the three volumes, examines issues of equality and difference and the effects within and across borders of kinds of discrimination on the basis of race, ethnicity, gender, disability, class, and sexual orientation. Nine essays are new, four of which were written especially for this volume.

Moral Issues in Global Perspective is available in three separate volumes Moral and Political Theory Human Diversity and Equality and Moral Issues *Sci-Fi Box Set: 140+ Dystopian Novels, Novels Space Adventures, Lost World Classics & Apocalyptic Tales* H.
