

What is Diversity?

The term diversity can have multiple meanings, depending on the context of its use. In a corporate environment, it might refer to strategies for recruiting, retaining and developing human capital in the workforce. In higher education, it could mean broadening the mix of gender and race in the admissions process. In the banking industry, it may mean not keeping all of your eggs in one basket.

But, for the purposes of this discussion, diversity—or multicultural education—is not something that can be taught directly, it is not a curriculum or lesson plan, or one-off observances of Cinco de Mayo or Black History Month. Rather, it is a collaborative effort among children, parents, families and colleagues to enable children to learn about their own backgrounds and those of people different from them; to see themselves and their communities represented in their program setting; and be exposed to activities that destroy stereotypes.⁶

Removing Privilege & Eliminating Personal Bias

In her essay, “White Privilege: Unpacking the Invisible Knapsack,” Peggy McIntosh asserted that the majority population (i.e., whites, and only for a short while longer) possesses a set of societal advantages. She cited a list of more than 50 instances of such privileges, which are “like an invisible weightless knapsack of special provisions, maps, passports, codebooks, visas, clothes, tools and blank checks.”

- *I do not have to educate my children to be aware of systemic racism for their own daily physical protection.*
- *I can remain oblivious of the language and customs of persons of color who constitute the world's majority without feeling in my culture any penalty for such oblivion.*
- *My children are given texts and classes which*

implicitly support our kind of family unit and do not turn them against my choice of domestic partnership.

McIntosh asserted that her longstanding beliefs acknowledged that racism put others at a disadvantage, but she had also been socialized “not to see one of its corollary aspect, white privilege, which puts me at an advantage.”

But, by removing these “denied and protected” privileges from the knapsack, she concluded, the privileges are “fully acknowledged, lessened or ended.”⁷

What is then done with this newfound knowledge is an open question, McIntosh concluded, of “whether we will choose to use this unearned advantage, and whether we will use any of our arbitrarily awarded power to try to reconstruct power systems on a broader basis.”

The Council asserts that removing these assumptions from the knapsack involves appreciating that they exist in early care and education settings, it means challenging them and challenging oneself to ensure a more inclusive worldview. Because early educators use a complex set of skills to meet the needs of children and families, the Council also agrees that teachers are expected to:

- Increase their sensitivity to different cultures, family compositions, religious practices and languages
- Become more aware of their own implicit and explicit biases that influence their teaching practices
- Avoid generalizing the traditions, beliefs and values an individual to a group or, conversely, from a group to an individual⁸
