Rollason,Pontifical Institute of Mediaeval Studies,2009 That kings prelates and even lowly freemen were under certain specified conditions capable of offering protection or peace to others usually their inferiors is relatively well known That a breach of this protection might entitle or indeed oblige the protector to take action against the violator is similarly well understood However this protective dynamic has rarely received direct scholarly attention despite its being evident in an extraordinary range of contexts The emotional aspects of protection the honour and love associated with the bond it creates and the shame and anger that accompany its breach resonate in both heroic and chivalric ideals whilst in legal fiction at least the king s protection or peace would come to underpin the common law of trespass Such a broad sweep taking in social legal religious and cultural elements suggests that protection as a concept may have a wider significance than its marginal role in current historiography would indicate Indeed the influence of protection both in forming social bonds and in providing a framework for the legitimate use of force suggests that the concept could serve as a valuable counterpoint to more traditional institutional understandings of power This book explores peace and protection as a fundamental motor of medieval society across a broad geographical and chronological span brings together literary legal and historical studies making use of a wide range of approaches and focuses scholarly attention as never before on the concept of peace and protection viewed in relation to kings and lords charity and mercy and the action of feud and vendetta The Waverley Novels ,1877 **The Evolution of Arthurian Romance from the Beginnings Down to the Year 1300** James Douglas Bruce,1923
