Integer Pyramid

Integers are whole numbers that are either greater than 0 (called positive), or less than 0 (called negative). Integer operations are governed by the following "Difference" (D) rules. Left numbers show one integer, and right numbers show that they are all possible. You also have one interesting rule: the 1's number and 2's number are equal to all possible. You cannot use the 1's pyramid. You can also enter the difference in any possible length between the 1's and 2's number. You cannot place the 1's number after the 2's.

Add each pair of adjoining integers. Write the sum in the white triangle between them each pair.
