Algebra L.E. Sigler, 2012-12-06 There is no one best way for an undergraduate student to learn elementary algebra Some kinds of presentations will please some learners and will disenchant others This text presents elementary algebra organized according to some principles of universal algebra Many students find such a presentation of algebra appealing and easier to

comprehend The approach emphasizes the similarities and common concepts of the many algebraic structures Such an approach to learning algebra must necessarily have its formal aspects but we have tried in this presentation not to make abstraction a goal in itself We have made great efforts to render the algebraic concepts intuitive and understandable We have not hesitated to deviate from the form of the text when we feel it advisable for the learner Often the presentations are concrete and may be regarded by some as out of fashion How to present a particular topic is a subjective one dictated by the author's estimation of what the student can best handle at this level We do strive for consistent unifying terminology and notation This means abandoning terms peculiar to one branch of algebra when there is available a more general term applicable to all of algebra We hope that this text is readable by the student as well as the instructor It is a goal of ours to free the instructor for more creative endeavors than reading the text to the students

Topics from Australian Conferences on Teaching Statistics Helen MacGillivray, Brian Phillips, Michael A. Martin, 2014-09-01 The first OZCOTS conference in 1998 was inspired by papers contributed by Australians to the 5th International Conference on Teaching Statistics In 2008 as part of the program of one of the first National Senior Teaching Fellowships the 6th OZCOTS was held in conjunction with the Australian Statistical Conference with Fellowship keynotes and contributed papers optional refereeing and proceedings This venture was so successful that the 7th and 8th OZCOTS were similarly run conjoined with Australian Statistical Conferences in 2010 and 2012 Authors of papers from these OZCOTS conferences were invited to develop chapters for refereeing and inclusion in this volume There are sections on keynote topics undergraduate curriculum and learning professional development postgraduate learning and papers from OZCOTS 2012 Because OZCOTS aim to unite statisticians and statistics educators the approaches

this volume takes are immediately relevant to all who have a vested interest in good teaching practices Globally statistics as a discipline statistical pedagogy and statistics in academia and industry are all critically important to the modern information society This volume addresses these roles within the wider society as well as questions that are specific to the discipline itself Other chapters share research on learning and teaching statistics in interdisciplinary work and student preparation for futures in academia government and industry

My Road to Miracle Marti Charles C Edgar, 2025-04-16 This book is about my life struggles how a child who grew up with a learning disability became a professor How someone who started out as an atheist became a follower of Jesus It is about a man who stood by his first wife's side while she battled multiple sclerosis A widower who remarried and stood by his second wife's side during her own struggles with cancer It is because of my walk with Jesus that I was able to care for my wives and endure the hardships along the way It is also why I have written this book to be an encouragement to others

Count Me In Della Dumbaugh, Deanna Haunsperger, 2022-02-24 This groundbreaking work explores the powerful role of communities in mathematics It introduces readers to twenty six different mathematical communities and addresses important questions about how they form how they thrive and how they advance individuals and the group as a whole The chapters celebrate how diversity and sameness bind colleagues together showing how geography gender or graph theory can create spaces for colleagues to establish connections in the discipline They celebrate outcomes measured by mathematical results and by increased interest in studying mathematics They highlight the value of relationships with peers and colleagues at various stages of their careers Together these stories offer a guide rather than a template for building and sustaining a mathematical community They call attention to critical strategies of rotating leadership and regular assessment and evaluation of goals and programs and promote an ongoing awareness of the responsibilities of life that impinge on mathematical creativity and contributions Whether you are giving thought to starting a group joining one already in existence or encouraging a colleague to participate in the broader mathematical community this book will meet you where you are and move you beyond It contains a plethora of ideas to foster a sense of belonging in the exciting discipline of mathematics

The Algebra Miracle: The True Story of a High-Poverty School's Triumph in the Age of Accountability Stuart Alan Singer, 2012-02-21 A miracle is defined as a highly improbable or extraordinary accomplishment The story of the Algebra program at JEB Stuart High School in Fairfax Virginia qualifies for such a designation Over a period of fifteen years a series of ambitious no cost innovations which challenged the prevailing status quo in math education led to a set of academic accomplishments that were indeed improbable and extraordinary This miracle was achieved by a high poverty ethnically diverse student body that was unique at the time but is now representative of schools found throughout the U S For everyone touched by education from parents and students to teachers and administrators The Algebra Miracle will provide insights into the complexity of finding a low cost formula for academic success in the tight budgetary times of the 21st century This story serves as a model of what can be accomplished when a

dedicated school staff commits its time energy and creativity to the needs of their students
