Helena Ribe,1990 Experience has proven that an orderly adjustment process designed to establish a new equilibrium growth
path is indispensable for improving the longer term position of the poor Some adjustment measures can affect the poor
adversely The most common way of addressing the adverse impact of adjustment has been the implementation of targeted
compensatory programs Such programs can compensate those affected directly by adjustment or provide temporary
employment or relief to the chronically poor Changes in the design of adjustment programs can promote the longer run
interest of the poor but have received relatively little attention Appropriate design changes can help to foster pro poor
growth and enable reallocations of public expenditures in ways that support or improve the efficiency of programs that help
the poor to take advantage of the emerging economic opportunities Finally appropriate design changes can target subsidies
more effectively Subsidies that have a large impact on the incomes of the poor should not be reduced or eliminated unless
alternative means of reaching the poor are introduced
