*Share Engage Educate* Vinesh Chandra, 2019-12-09 There is no doubt that our world is becoming increasingly more connected through digital technologies For meaningful participation in this environment we need to be digitally literate yet there are many children in developing countries who have yet to touch a computer because of social disadvantage For these children schools are the only place where they can build this capacity Regrettably many schools in these communities are under resourced They do not have sufficient and relevant library books let alone digital resources As a consequence teaching and learning strategies have remained unchanged for decades The field of critical pedagogy evolved through the initial work of Paulo Freire This theory is underpinned by critical thinking about societal issues followed by action and reflection When citizens are armed with such knowledge and skills they can positively impact on the lives of the underprivileged Critical pedagogy however is still struggling to find its meaningful place particularly in higher education This is largely due to the lack of effective strategies and critical educators *Share Engage Educate* is an auto ethnography which presents accounts of the initiatives that were undertaken to promote print and digital literacy in rural and remote schools in eight developing countries It highlights the experiences of school leaders teachers university staff and students and globally minded citizens working alongside local communities to enhance the quality of education for over 15 000 children in these schools This book explores how critical pedagogy can unfold in educational spaces through knowledge sharing engaging and in the process educating all stakeholders

**Building Bridges** Stuart Pizer, 2021-12-29 In *Building Bridges* Stuart A Pizer gives much needed recognition to the central role of negotiation in the analytic relationship and in the therapeutic process Building on a Winnicottian perspective that comprehends paradox as the condition for preserving an intrapsychic and relational potential space Pizer explores how the straddling of paradox requires an ongoing process of negotiation and demonstrates how such negotiation articulates the creative potential within the potential space of analysis Following careful review of Winnicott's perspective on paradox via the pairings of privacy and interrelatedness isolation and interdependence ruthlessness and concern and the notion of transitional phenomena Pizer locates these elemental paradoxes within the negotiations of an analytic process Together he observes analyst and patient negotiate the boundaries potentials limits tonalities resistances and meanings that determine the course of their clinical dialogue Elaborating on the theme of a multiply constituted distributed self Pizer presents a model for the tolerance of paradox as a developmental achievement related to ways in which caretakers function as transitional mirrors He then explores the impact of trauma and dissociation on the child's ability to negotiate paradox and clarifies how negotiation of paradox differs from negotiation of conflict Pizer also broadens the scope of his study by turning to negotiation theory and practices in the disciplines of law diplomacy and

dispute resolution Enlivened by numerous clinical vignettes and a richly detailed chronicle of an analytic case from its earliest negotiations to termination *Building Bridges* adds a significant dimension to theoretical understanding and clinical practice Now republished as a Classic Edition with an Introduction by Donnel Stern this book is altogether a psychoanalytic work of our time

The Tree R. A. Brown, 2010-12-22 This book of fiction raises one likely possibility for the immediate future given recent history It also considers the idea that at some point everyone wonders what is the meaning of all this stuff surrounding us the earth the solar system the universe and time Is it all meant just for Homo sapiens This author explores the best answer that science and or faith can deliver at this moment It is the answer that you most likely would have arrived at if you had decided to become a scientist as an occupation and a novelist philosopher as a preoccupation It starts with what we know about this planet its flora and fauna including that special species Homo sapiens where the metaphor of the vanity of Don Quixote versus the humility and reality of Sancho Panza is used In this context we can examine ways to enjoy life given a healthy respect for our limitations It helps explain our cultural successes failures and helps us come to terms with what we are It is a thriller novel designed to make the philosophy palatable As such it should be entertaining and intellectually satisfying This 2nd edition is condensed for easy reading In a word this book is provocative I think it s ideal reading for book clubs because it forces you to think about man s role in the universe s and so much of the middle portion is an ideal source for discussion topics If you like science read it If you dislike science read it twice N Johnson Seattle WA USA

The author insightfully contemplates the essential meaning of human life from a scientist s point of view while rehearsing the progress of mankind through the historical record by telling the life story of one individual He points to an inevitable conclusion that is eerily contemporary Rev Ken Snyder Maui Brown cooks up a scenario which I first thought as too fantastic but when I reflect on the present state of the world and the possible consequences of the proliferation of nuclear arms the scenario becomes believable and scary I could relate to much of the story I will be more vigilant on my next hike in the Cascades A very readable yarn Ramesh Gangolli Seattle WA
