Violence Through Environmental Discrimination Günther Baechler, 2013-03-09 Since all out interstate wars for the time being seem to belong to the past conflict studies focus more and more on domestic conflicts This is a broad field not only because the arbitrary line between war and sub war violence disappears and the analyst is confronted with phenomena reaching from criminal violence and clashes between communities to violent conflicts of long duration and civil wars with massacres and genocides as their characteristics It is also because there are so many different types of conflicts to be analyzed so many different types of behavior to be studied whereas there is often little information available on what is really going on Against the background of internal conflicts which tend to be as protracted as diffuse in terms of time intensity actors and their goals this study aims to follow a specific pathway through the current thicket of violent circumstances It focuses on causation patterns by exploring the causal role of the environmental factor in the genesis of violent conflicts occurring today and probably even more so tomorrow This approach which for once does not focus on a specific level of the conflict system on one area in the conflict geography or on a specific category of actors analyzes causation dynamics

Is Mormonism Christian? Jacob O. Gurley, Ernest E. Dean, 2013 A familiar sight in America today is seeing two young men wearing ties white shirts with name tags and black pants pedaling their bicycles through towns and neighborhoods Most recognize the uniform of young Mormon missionaries on their two year mission seeking to promote and convert anyone willing to listen to their story What is becoming increasingly familiar is the rise of entertainment and political figures also identifying themselves as practicing Mormons What is difficult for many Americans is deciding whether the gospel the LDS Church has promoted over the past two centuries is the same gospel proclaimed by traditional Christian churches over the past two millennia Are they sincere Christians a non Christian cult or something else altogether This book seeks to provide an understanding of the history and basic beliefs of traditional Christianity and compare them to the history and beliefs of Mormonism

Politics of Fear Manuel G. Gonzales, Richard Delgado, 2015-12-03 Lucidly written widely informed and uncompromisingly honest a valuable expose Michael Parenti Documents the stunning success of a network of wealthy donors and corporations in creating and sustaining a set of think tanks legal action groups and media strategies Gary Orfield Harvard University What explains the electoral success of Republicans particularly of the ascendant neoconservatives who now dominate the Party Based on a thorough and up to date examination of the New Right over twenty five years The Politics of Fear proposes some provocative answers including globalization new technologies and a far reaching network of right wing think tanks and foundations As the authors show all have opened the doors to a new politics of fear successfully waged by the neoconservatives By manipulating insecurity the New Right has created an extraordinarily successful populist conservative movement Utilizing extensive documentation the authors argue convincingly that the fear of immigrants and racial minorities has served as the most effective tactic in the GOP arsenal while their approach also implicates gays feminists and terrorists The book explains why Americans have willingly supported a party that promises them security just as it delivers greater economic and political insecurity The authors argue that despite their striking political successes neoconservatives have delivered to voters a set of policies harmful to working Americans in the way of regressive tax measures military exploits tort reform deregulation and environmental destruction

Knowledge, Desire and Power in Global Politics Chengxin Pan, 2012-01-01 China threat or China opportunity like beauty is in the eyes of the beholder Western imaginations of China come under close scrutiny in this book in a new philosophical depth seldom attempted before Dr Pan

displays in full force his analytical skills and his mastery of knowledge both East and West. Contrary to conventional approaches he takes a step back to exercise a powerful reflective process to watch the China watchers with illuminating results. Dr Pan's book deserves wide and careful reading. Professor Gerald Chan, University of Auckland, New Zealand. The rise of China is largely seen as either a threat or an opportunity. Chengxin Pan exposes both of these representations as expressions of Western fears and desires for certainty and predictability. His call for a more reflective and culturally sensitive understanding of China offers an important contribution to one of the big political debates of our time. Professor Roland Bleiker, University of Queensland, Australia. This is a brilliant and insightful treatment of Western representations of China with a theoretical framework suggesting they come not only from China itself but also the West. Although it is not the first treatment of this topic, it is innovative in considering the China threat and China opportunity. Both aspects of the rise of China are of crucial importance for our times. With provocative conclusions, it is a truly path-breaking contribution to the literature. I recommend it highly. Emeritus Professor Colin Mackerras, Griffith University, Australia. Pan has produced a book which not only challenges some basic assumptions about the nature of China's rise but more importantly forces us to rethink the very basic starting points of how we know what we know about China. Professor Shaun Breslin, University of Warwick, UK. How is the rise of China perceived in the West? Why is it often labelled as threat and/or opportunity? What are the implications of these China imageries for global politics? Taking up these important questions, this groundbreaking book argues that the dominant Western perceptions of China's rise tell us less about China and more about Western self-imagination and its desire for certainty. Chengxin Pan expertly illustrates how this desire, masked as China knowledge, is bound up with the political economy of fears and fantasies, thereby both informing and complicating foreign policy practice in Sino-Western relations. Insofar as this vital relationship is shaped not only by China's rise but also by the way we conceptualise its rise, this book makes a compelling case for critical reflection on China watching. *Knowledge, Desire and Power in Global Politics* is the first systematic and deconstructive analysis of contemporary Western representation of China's rise. Setting itself apart from the mainstream empiricist literature, its critical interpretative approach and unconventional and innovative perspective will not only strongly appeal to academics, students and the broader reading public but also likely spark debate in the field of Chinese international relations.

Why Sex Matters Bobbi S. Low, 2015-01-04. Why are men like other primate males usually the aggressors and risk takers? Why do women typically have fewer sexual partners? In *Why Sex Matters*, Bobbi Low ranges from ancient Rome to modern America, from the Amazon to the Arctic and from single-celled organisms to international politics to show that these and many other questions about human behavior largely come down to evolution and sex. More precisely, as she shows in this uniquely comprehensive and accessible survey of behavioral and evolutionary ecology, they come down to the basic principle that all organisms evolved to maximize their reproductive success and seek resources to do so, but that sometimes cooperation and collaboration are the most effective ways to succeed. This newly revised edition has been

thoroughly updated to include the latest research and reflect exciting changes in the field including how our evolutionary past continues to affect our ecological present **NATO -- the 1990s** ,1993 *Cocktails from Hell* Col. Austin Bay,2018-12-18 Even in the absence of a major war the world remains a dangerous place Fuses are lit in practically every region and on every continent which could eventually ignite a global conflagration and draw the world s superpowers into a deadly and catastrophic conflict The U S Russia and China all eye these regional conflicts with care each hoping to use this turmoil to its advantage Meanwhile each of these countries attempts to avoid major direct intervention that would trigger their rivals into action We are perhaps at the most dangerous moment since 1914 when similar smoldering conflicts led to the senseless mass slaughter known as World War I In *Cocktails from Hell* Col Austin Bay provides a concise and indispensable guide to the most dangerous threats against peace facing the United States and the world An expert in military strategy analysis and planning Bay uses his critical eye and sharp pen to bring each of these bubbling global situations into sharp focus both in their local and global contexts Civilian students of war and military experts alike will benefit from his knowledge and insights If you truly want to understand the state of today s society and the role that the U S must play in order to successfully avoid the next Great War this book is a must read **Afghanistan : Selected References** ,1990
