Great camel caravans brought salt, iron, copper, cloth, books, and pearls from the north and northeast. They were exchanged for gold, kola nuts, ivory, leather, rubber, and slaves from the south. The Niger River became a major artery of trade. When the caravans met the Niger, their goods would be unloaded on riverboats, and the camels would return north carrying valuable commodities from the south like gold.

The Rebirth of Education Lant Pritchett,2013-09-30 Despite great progress around the world in getting more kids into schools too many leave without even the most basic skills In India s rural Andhra Pradesh for instance only about one in twenty children in fifth grade can perform basic arithmetic The problem is that schooling is not the same as learning In *The Rebirth of Education* Lant Pritchett uses two metaphors from nature to explain why The first draws on Ori Brafman and Rod Beckstrom s book about the difference between centralized and decentralized organizations The Starfish and the Spider Schools systems tend be centralized and suffer from the limitations inherent in top down designs The second metaphor is the concept of isomorphic mimicry Pritchett argues that many developing countries superficially imitate systems that were successful in other nations much as a nonpoisonous snake mimics the look of a poisonous one Pritchett argues that the solution is to allow functional systems to evolve locally out of an environment pressured for success Such an ecosystem needs to be open to variety and experimentation locally operated and flexibly financed The only main cost is ceding control the reward would be the rebirth of education suited for today s world
