Indian Emission Norms and Practices Mr P. Vignesh, Dr. A.R. Pradeep Kumar, Dr. N. Shankar Ganesh, In India, vehicle emission standards were implemented in 1991 for gasoline vehicles and in 1992 for diesel vehicles. Since 2000, Euro standards have been followed in India under the name Bharat Stage Emission Standards for four wheeled vehicles. Since October 2010, Bharat Stage III norms have been implemented throughout India. Bharat Stage IV norms have been in effect in a few cities since April 2010. Bharat Stage IV is expected to be implemented throughout India by April 2017. It is

already in use in 13 major cities Upgrading the emission standards necessitates the upgrading of manufacturing companies technology which raises the cost of the vehicle One of the main reasons for the slow upgrade of emission standards is cost However there are some who argue that the cost increase is offset by cost savings in health care because the pollutants that cause disease are reduced as emission standards are raised Fuels are also important in meeting these emission standards Fuel specifications have also been aligned with the corresponding European production norms *Modeling, Simulation, and Control of AI Robotics and Autonomous Systems* Choudhury, Tanupriya, Mary X., Anitha, Chowdhury, Subrata, Karthik, C., Evangeline, C. Suganthi, 2024-05-23 The chasm between the physical capabilities of Intelligent Robotics and Autonomous Systems IRAS and their cognitive potential presents a formidable challenge While these machines exhibit astonishing strength precision and speed their intelligence and adaptability lag far behind This inherent limitation obstructs the realization of autonomous systems that could reshape industries from self driving vehicles to industrial automation The solution to this dilemma is unveiled within the pages of *Modeling Simulation and Control of AI Robotics and Autonomous Systems* Find within the pages of this book answers for the cognitive deficit within IRAS While these systems boast remarkable physical capabilities their potential for intelligent decision making and adaptation remains stunted thereby bringing innovation to a halt Solving this issue would mean the re acceleration of multiple industries that could utilize automation to prevent humans from needing to do work that is dangerous and could revolutionize transportation and more
