#### **Module 1 - Judging the Relevance and Worth of Ideas, Soundness of Author's Reasoning, and the Effectiveness of the Presentation**

People have a tendency to assume that what is written is accurate. This is not the case all the time. There are elements that we have to check before we can accept that something written has relevance and worth of ideas, soundness of author's reasoning, and an effective presentation. These elements include:

1. **PROBLEM** - An article needs to have a real problem that needs to be resolved; something that is addressed to a specific kind of person.
2. **SPEAKER'S STAND** - The speaker's stand can be directly expressed or implied. Whichever in this case, a speaker's stand should be present in the article.
3. **PROPOSED SOLUTION/S** - For the author's presentation of the article, a concrete solution has to be recommended before the piece of writing ends.
4. **REFERENCE/S** - To ensure credibility in an author's work, references from other resources should be readily available, may it be online or in printed form. If it is hard to find another reference that has the same claims as that of the writer, then, the claim can be considered unfounded or fictitious.

Heron,Alina Mihaela Mihai,2020-02-13 Oligometastatic disease represents an intermediate state between the early localized disease and widespread metastatic malignancy Some patients with oligometastatic disease treated by ablative therapies to all sites of metastatic disease can achieve long disease free survival and sometimes cure Stereotactic radiosurgery SRS and stereotactic body radiation therapy SBRT are accepted treatment options for these patients achieving high rates of local control While most of the studies report outcomes of SBRT for solitary oligometastasis patients with oligometastatic disease might present with multiple concurrent

lesions either in the same organ or in neighboring organs There are few studies addressing the role of SBRT in patients with multiple concurrent oligometastases Furthermore these patients likely recur either in the same organ or at distance Therefore the need for retreatment with SBRT might be required There remains a dearth of data regarding the re irradiation after prior SBRT toxicity and dose volume constraints Particularly as it related to significant improvements in systemic therapies including immunotherapies it is likely that patients with widespread metastases can become oligometastatic after systemic treatments While targeted immune therapies and SBRT are increasingly used in patients with oligometastatic disease their sequencing interaction and toxicities have not been studied and are poorly understood In this e book we discuss the state of the science of oligometastatic disease SBRT in a variety of locations and outline potential future direction of research efforts
