Question 1

11 pts

Many do you think the profit margin for Anagene's cartridges has been fluctuating? Is there attributable to the actual number of cartridges sold or the change in the number of the existing system that are using the cartridge the most?

The actual number of cartridges sold has not changed. The company looked at the estimated number of cartridges produced and reduced the quantity of the cartridges sold. This led to the estimated number of cartridges sold change. Finally, company revenue is calculated as the quantity of cartridges sold multiplied by the price per cartridge.
