Analysis Of Shona Set S:

Vowel Epenthesis in Loanword Adaptation Christian Uffmann, 2012-02-14 While it is commonly assumed that languages epenthesize context free default vowels this book shows that in loanword adaptation several strategies are found which interact intricately Large loanword corpora in Shona Sranan Samoan and Kinyarwanda are analyzed statistically and the patterns are modeled in a version of Optimality Theory which introduces constraints on autosegmental representations The focus of this book is on English loans in Shona providing an in depth empirical and formal analysis of epenthesis in this language The analysis of additional languages allows for solid typological generalizations In addition a diachronic study of epenthesis in Sranan provides insight into how insertion patterns develop historically In all languages analyzed default epenthesis exists alongside vowel harmony and spreading from adjacent consonants While different languages prefer different strategies these strategies are subject to the same set of constraints however In spreading feature markedness plays an important role alongside sonority We suggest universal markedness scales which combine with constraints on autosegmental configurations to model the patterns found in individual languages and at the same time to constrain the range of possible crosslinguistic variation

The Five-Factor Model of Personality Across Cultures Robert R. McCrae, Juri Allik, 2012-12-06 ROBERT R MCCRAE it is simply personality research conducted in different countries The implicit assumption behind this practice is that personality processes are universal and where they are studied

is thus of no consequence An insensitivity to cultural context once imputed mostly to Americans now appears to characterize the field worldwide Fortunately recent years have also seen a rise of interest in studies of personality and culture Church 2001 Church Lee McCauley McCrae 2000 What do these new studies show Are personality processes indeed universal or are there significant variations across cultures that necessitate a more nuanced approach to research There is as yet no definitive answer to that question In some respects human personality does seem to transcend the boundaries of language and culture in other respects it is profoundly influenced by social and historical forces Sorting these issues out must be a priority for our field if we are to understand the current personality literature
