

Refer to the plot plan for Highland Office Supply to answer questions 2 through 7.
Local ordinances require the following for commercial office buildings:

Setbacks—40'-0" from front street curb; 25'-0" on each side; 20'-0" on back.

Parking—two 200 sq ft parking spaces per 1000 sq ft of office space

Green space—10% minimum of total lot size

Maximum building size—40% of total lot size

2. Are front and back setbacks sufficient to meet local ordinance requirements?
3. What is the east setback?
4. How many square feet does the building contain?
5. Is the number of parking spaces sufficient to meet local ordinance requirements?
6. What is the south setback?
7. What is the area (in square feet) of the lot?

Question Answering over Text and Knowledge Base Saeedeh Momtazi, Zahra

Abbasiantaeb, 2022-11-04 This book provides a coherent and complete overview of various Question Answering (QA) systems. It covers three main categories based on the source of the data that can be unstructured text (TextQA), structured knowledge graphs (KBQA), and the combination of both. Developing a QA system usually requires using a combination of various important techniques, including natural language processing, information retrieval, and extraction, knowledge graph processing, and machine learning. After a general introduction and an overview of the book in Chapter 1, the history of QA systems and the architecture of different QA approaches are explained in Chapter 2. It starts with early close domain QA systems and reviews different generations of QA up to the state of the art hybrid models. Next, Chapter 3 is devoted to explaining the datasets and the metrics used for evaluating TextQA and KBQA. Chapter 4 introduces the neural and deep learning models used in QA systems. This chapter includes the required knowledge of deep learning and neural text representation models for comprehending the QA models over text and QA models over knowledge base explained in Chapters 5 and 6 respectively. In some of the KBQA models, the textual data is also used as another source besides the knowledge base; these hybrid models are studied in Chapter 7. In Chapter 8, a detailed explanation of some well-known real applications of the QA systems is provided. Eventually, open issues and future work on QA are discussed in Chapter 9. This book delivers a comprehensive overview on QA over text, QA over knowledge base, and hybrid QA systems, which can be used by researchers starting in this field. It will help its readers to follow the state of the art research in the area by providing essential and basic knowledge.

Java Tutorial Questions Siu Nin Lam, 2013-06-11 Over 900 multiple choice questions for Java programming. All questions come with full answer keys.

Choices other than the correct answers are traps from common mistakes thus enabling targeted explanation in the answer key Suitable for both students and professionals preparing for Java programming examinations **PDII Practice**
