

Chapter 26 Sound

Exercises

26.1 The Origin of Sound (page 515)

Match each sound source with the part that vibrates.

- | Sound Source | Vibrating Part |
|------------------------|------------------------------------|
| <u>a</u> 1. violin | a. strings |
| <u>b</u> 2. your voice | b. reed |
| <u>d</u> 3. saxophone | c. column of air at the mouthpiece |
| <u>c</u> 4. flute | d. vocal chords |
5. Sound waves are a type of longitudinal wave.
6. What normally determines the frequency of sound waves?
The frequency of sound waves produced normally have the same frequency as the vibrating source.
7. Define pitch.
Pitch is our subjective impression about the frequency of sound.
8. As people grow older, they often have more trouble hearing sounds at the high end of the range of frequencies.
9. Sound waves with frequencies below the normal range are infrasonic waves.
10. Sound waves with frequencies above the normal range are ultrasonic waves.

26.2 Sound in Air (pages 515–517)

11. Is the following sentence true or false? Sound vibrates the air much like particles move back and forth along a stretched spring. true
12. A pulse of compressed air is called a compression, and a pulse of low-pressure air is called a rarefaction.
13. For all wave motion, it is not the medium that travels, but a pulse that travels.
14. Explain what happens when a tuning fork is struck against one end of an open tube.
When the prong is struck, a compression enters the tube. When the prong swings away, a rarefaction follows the compression. A series of compressions and rarefactions is produced within the tube as the fork continues to vibrate.

26.3 Media That Transmit Sound (page 517)

15. What did Native Americans learn long ago when they put their ears to the ground?
They could hear the hoofbeats of distant horses through the ground before they could hear them through the air.

Answers Exercises Chapter :

Exercises with Solutions in Radiation Physics Bo N. Nilsson, 2015-11-21 The textbook begins with exercises related to radioactive sources and decay schemes The problems covered include series decay and how to determine the frequency and energy of emitted particles in disintegrations The next chapter deals with the interaction of ionizing radiation including the treatment of photons and charged particles The main focus is on applications based on the knowledge of interaction to be used in subsequent work and courses The textbook then examines detectors and measurements including both counting statistics and properties of pulse detectors The chapter that follows is dedicated to dosimetry which is a major subject in medical radiation physics It covers theoretical applications such as different equilibrium situations and cavity theories as well as experimental dosimetry including ionization chambers and solid state and liquid dosimeters A shorter chapter deals with radiobiology where different cell survival models are considered The last chapter concerns radiation protection and health physics Both radioecology and radiation shielding calculations are covered The textbook includes tables to simplify the solutions of the exercises but the reader is mainly referred to important websites for importing necessary data

Surface Science Kurt W. Kolasinski, 2012-04-30 Surface science has evolved from being a sub field of chemistry or physics and has now established itself as an interdisciplinary topic Knowledge has developed sufficiently that we can now understand catalysis from a surface science perspective No where is the underpinning nature of surface science better illustrated than with nanoscience Now in its third edition this successful textbook aims to provide students with an understanding of chemical transformations and the formation of structures at surfaces The chapters build from simple to more advanced principles with each featuring exercises which act not only to demonstrate concepts arising in the text but also to form an integral part of the book with the last eight chapters featuring worked solutions This completely revised and expanded edition features More than 100 new pages of extensive worked solutions New topics including Second harmonic generation SHG Sum Frequency Generation SFG at interfaces and capillary waves An expanded treatment of charge transfer and carbon based materials including graphene Extended Frontiers and Challenges sections at the end of each chapter This text is suitable for all students taking courses in surface science in Departments of Chemistry Physics Chemical Engineering and Materials Science as well as for researchers and professionals requiring an up to date review of the subject

By taking principles and concepts presented in the text and applying them to professional practice students will be able to assess how their interests and skills can contribute to the growing field of sport management. Applied Sport Management Skills Second Edition has been thoroughly updated to enhance the educational experience. Two new features have been added to the second edition: Social Media Exercises expose students to the expanding role of social media in managing a sport organization and Starting a Sport Business features encourage students to explore the real world needs of sport entrepreneurship such as developing an organizational structure formulating ideas on leading employees and controlling the financial aspects of their sport business. These new tools complement popular features from the first edition to help students understand leadership and management in the sport industry. Reviewing Their Game Plan chapter opening scenarios revisited throughout each chapter provide a cohesive thread to keep students focused on how sport managers use the concepts on the job. Chapter closing case studies questions and exercises help students apply knowledge to specific situations. Applying the Concept question boxes provide an opportunity for critical thinking by asking how specific concepts are relevant to a sport situation. Time Out boxes demonstrate how text concepts relate to students' actual experience in sports including part time full time and summer jobs. Self assessment exercises offer insight into students' strengths and weaknesses. Behavior models provide step by step guidance on handling day to day situations that students will face in the sport setting. Developing Your Skills features learning outcomes and key terms are revisited throughout the chapter to reinforce key points. Instructor resources have been updated with this edition and the expanded instructor guide provides advice on using the student web study guide with the book material to better engage students. The web study guide is better organized and integrated with the text to help students use the learning activities in a dynamic and interactive setting. Exercises appearing in the book are correspondingly numbered in the web study guide where students may test their understanding with quizzes and other activities that further reinforce important concepts. Many activities in the web study guide can be completed as graded class assignments whereas others provide
