Novel & Intelligent Digital Systems: Proceedings of the 2nd International Conference (NiDS 2022) Akrivi Krouska, Christos Troussas, Jaime Caro, 2022-09-22 This book summarizes the research findings presented at the 2nd International Conference on Novel Intelligent Digital Systems NiDS 2022 NiDS 2022 was implemented virtually due to COVID 19 restrictions on September 29 30 2022 under the auspices of the Institute of Intelligent Systems NiDS lays special emphasis on the novelties of intelligent systems and on the interdisciplinary research which enables supports and enhances artificial intelligence AI in software development It promotes high quality research creating a forum for the exploration of challenges and new advances in AI and addresses experts researchers and scholars in the fields of artificial and computational intelligence in systems and in computer sciences in general enabling them to learn more about pertinent strongly related and mutually complementary fields The conference promotes an exchange of ideas reinforcing and expanding the network of researchers academics and market representatives

Tropical Forest Ecosystem Responses to Increasing Nutrient Availability Jürgen Homeier, Selene Báez, Dietrich Hertel, Christoph Leuschner, 2017-09-08 Deforestation and land use change have led to a strong reduction of tropical forest cover during the last decades Climate change will amplify the pressure to the remaining refuges in the next years In addition tropical regions are facing increasing atmospheric inputs of nutrients which will have unknown consequences for the structure and functioning of these systems no matter if they are within protected areas or not Even remote areas are expected to receive rising amounts of nutrients The effects of higher rates of atmospheric nutrient deposition on the biological diversity and ecosystem functioning of tropical ecosystems are poorly understood and our knowledge of nutrient fluxes and nutrient limitation in tropical forest ecosystems is still limited Yet it will be of paramount importance to know the effects of increased nutrient availability to conserve these ecosystems with their biological and functional diversity During the last years research efforts have more and more focused on the understanding of the role of nutrients in tropical ecosystems and several coordinated projects have been established

that study the effects of experimental nutrient addition This Research Topic combines results from experiments and from observational studies with the aim to review and conclude on our current knowledge on the role of additional nutrients in ecosystems

Intelligent Solutions for Optimizing Agriculture and Tackling Climate Change: Current and Future Dimensions Karmaoui, Ahmed,2023-01-06 The interactions between climate change agriculture and technology are of increasing concern to academicians educators and planners After the publication of the first report of the Intergovernmental Panel on Climate Change IPCC studies of the impact of climate change on productive systems such as agriculture have multiplied The best solution can be found in new technologies and tools Intelligent Solutions for Optimizing Agriculture and Tackling Climate Change Current and Future Dimensions explores the importance of artificial intelligence and its effects on the future of agriculture It further highlights the opportunities and challenges of artificial intelligence in the agricultural field Covering topics such as agroforestry farming productivity and population projections this premier reference source is an indispensable resource for climate scientists agricultural scientists policymakers computer scientists engineers students and educators of higher education libraries researchers and academicians
