Name _____
Date _____

Purpose:

To determine which model of the atom best represents the present understanding.

Part I: Making Decisions on Historical Models

Below are three models of the atom. Each model was developed at a different time in history. Read each model carefully. Then, decide which model you think best represents the present understanding of the atom. Write your answer in the space provided.

Model 1: The atom is a solid sphere of positive charge with negative charges (electrons) embedded in it. (Thomson, 1904)

Draw a diagram of the atom you think best represents the present understanding of the atom.

Model 2: The atom is a solid sphere of positive charge with negative charges (electrons) embedded in it. The negative charges are distributed in a uniform manner throughout the sphere. (Thomson, 1904)

Draw a diagram of the atom you think best represents the present understanding of the atom.

Model 3: The atom is a solid sphere of positive charge with negative charges (electrons) embedded in it. The negative charges are distributed in a uniform manner throughout the sphere. (Thomson, 1904)

Draw a diagram of the atom you think best represents the present understanding of the atom.
