

12. Figure 12 shows a different, more complex case of the dynamics of the system when the conditions that give rise to the cycle and the conditions that cause the cycle to end.

Figure 11.20 is a summary of the important features of the three cases. The three cases give the maximum the average velocity, v_{avg} , in each case. However, notice that the three cases agree upon the average velocity when the velocity is constant. This is the only case where the average velocity is the same as the average of the initial and final velocities.
