 Welch,2014-09-19 This volume recreates the received notion of reflective equilibrium It reconfigures reflective equilibrium as
 both a cognitive ideal and a method for approximating this ideal The ideal of reflective equilibrium is restructured using the
 concept of discursive strata which are formed by sentences and differentiated by function Sentences that perform the same
 kind of linguistic function constitute a stratum The book shows how moral discourse can be analyzed into phenomenal
 instrumental and teleological strata and the ideal of reflective equilibrium reworked in these terms In addition the work
 strengthens the method of reflective equilibrium by harnessing the resources of decision theory and inductive logic It
 launches a comparative version of decision theory and employs this framework as a guide to moral theory choice It also
 recruits quantitative inductive logic to inform a standard of inductive cogency When used in tandem with comparative
 decision theory this standard can aid in the effort to turn the undesirable condition of reflective disequilibrium into reflective
