 Gianfranco Pistoia, 2010-07-27 **Electric and Hybrid Vehicles Power Sources Models Sustainability Infrastructure and the Market** reviews the performance, cost, safety and sustainability of battery systems for hybrid electric vehicles (HEVs) and electric vehicles (EVs) including nickel metal hydride batteries and Li-ion batteries. Throughout this book, especially in the first chapters, alternative vehicles with different power trains are compared in terms of lifetime cost, fuel consumption and environmental impact. The emissions of greenhouse gases are particularly dealt with. The improvement of the battery or fuel cell performance and governmental incentives will play a fundamental role in determining how far and how substantial alternative vehicles will penetrate into the market. An adequate recharging infrastructure is of paramount importance for the diffusion of vehicles powered by batteries and fuel cells as it may contribute to overcome the so-called range anxiety. Thus, proposed battery charging techniques are summarized and hydrogen refueling stations are described. The final chapter reviews the state of the art of the current models of hybrid and electric vehicles along with the powertrain solutions adopted by the major automakers. Contributions from the world's leading industry and research experts. Executive summaries of specific case studies. Information on basic research and application approaches Eco Barons Edward Humes, 2009 From Pulitzer Prize winner Edward Humes comes *Eco Barons*, the story of the remarkable visionaries who have quietly dedicated their lives and their fortunes to saving the planet from ecological destruction. While many people remain paralyzed by the scope of Earth's environmental woes, *eco barons*, a new and largely unheralded generation of Rockefellers and Carnegies, are having spectacular success saving forests and wildlands, pulling endangered species back from the brink and pioneering the clean and green technologies needed if life and civilization are to endure. A groundbreaking account that is both revealing and inspiring, *Eco Barons* tells of the former fashion magnate and founder of Esprit who has saved more rainforests than any other person and of the college professor who patented the car that can save the world: the plug-in hybrid. There are the impoverished owl wranglers who founded the nation's most effective environmental group and forced a reluctant President George W. Bush to admit that humans cause global warming. And there is the former pool cleaner to Hollywood stars who became the guiding force behind a worldwide effort to reduce greenhouse gas emissions. At a time when there is no shortage of dire news about the environment, *Eco Barons* offers a story of hope, redemption and promise: proof that one person with determination and vision can make a difference **Ukraine Industrial and Business Directory Volume 1 Strategic Information and Contacts** IBP, Inc., **Public Works Manual**, 1998 Canadian Periodical Index, 1997
