Surface Area

Practice each 3-dimensional figure's surface area formula. Be certain you are using the correct formula. The formulas below are for regular solids only. Irregular solids (like a house) have formulas that require additional information that is not shown here. For example, the area of the roof of a house is not the same as the area of the roof of a house with a gabled roof. The area of the roof of a house with a gabled roof is the area of the roof of the house plus the area of the roof of the gable.

Surface Area of a Sphere:	$SA = 4\pi r^2$ or $SA = \pi d^2$
Surface Area of a Prism:	$SA = 2B + Ph$ where B is the area of the base, P is the perimeter of the base, and h is the height of the prism.
SA of a Cylinder:	$SA = 2\pi r^2 + Ph$ where r is the radius of the base, P is the perimeter of the base, and h is the height of the cylinder.
Surface Area of a Pyramid:	$SA = B + Ph$ where B is the area of the base, P is the perimeter of the base, and h is the height of the pyramid.

Examples

Find the surface area of each solid. Round to the nearest hundredth.
