

LESSON 11.2 - Areas of Circles and Sectors

- A **SECTOR** of a circle is the region bounded by two radii of a circle and their intercepted arc.

AREA OF A SECTOR

The ratio of the area of a sector of a circle to the area of the whole circle (πr^2) is equal to the ratio of the measure of the intercepted arc to 360° .

$$\frac{\text{Area of sector } ACB}{\pi r^2} = \frac{m\widehat{AB}}{360^\circ}$$

From Practice to Praxis: A reflexive turn Susan Groundwater-Smith,2016-11-10 From Practice to Praxis is an exploration of the development of ethical practice as it applies to the meaning of quality within the tradition of practitioner inquiry and participatory research Chronicling some of her most important works this is a compelling overview of Susan Groundwater

Smith's contribution to the evolution of the nexus between thinking and theory as it stands between the academy and the field. It traces the steps between instrumental reasoning towards a more liberatory and challenging stance. The book selects from a number of publications each representing the genesis of the nascent ideas that have informed Susan's practice as a scholar and researcher. Taking a praxis stance draws attention not only to procedural concerns how things are done but also substantive issues that are associated with different forms of dialogue and trustworthiness why things are done. In addition to the assemblage of articles and chapters the book is prefaced by a long essay that reveals those features of the writer's self understanding as it is illuminated throughout the selection. The work is situated within a professional life history as well as relating to extant writings on theory and practice within a complex cultural and ever changing professional educational environment. From Practice to Praxis will appeal to initial teacher education students in both primary and secondary settings as well as post graduate students with an interest in action research participant research with both practitioners in the field and young people.
