

MARK SCHEME for the May/June 2014 series

2281 ECONOMICS

2281/22

Paper 2 (Structured Questions), maximum raw mark 90

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2014 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

Economic Warfare Teoman M. Hagemeyer-Witzleb,2021-07-14 Since the prohibition of the threat or use of force and the resurgence of economic nationalism economic warfare has become an increasingly important substitute for actual hostilities between states Its manifestations range from medieval sieges to modern day trade wars Despite its long history economic warfare remains an elusive term foreign to international law This book seeks to identify those portions of international law that are applicable to economic warfare What is the status quo of regulation Is there a jus ad bellum oeconomicum A jus in bello oeconomico After putting forward its own definition of economic warfare the book reviews historical case studies reflecting the three main branches of international economic law trade investment and currency to identify pertinent legal boundaries While the case studies reveal that numerous rules of international economic law regulate specific measures of economic warfare it remains to be seen whether analogously to the prohibition of the threat or use of force these selective limitations have the potential to coalesce into a general prohibition of economic warfare in the future Daily Trade Bulletin

Russia and the World in the Putin Era Roger E. Kanet, Dina Moulioukova, 2021-09-27 This volume examines the role of Russia in the world under President Putin's rule When the Soviet Union disintegrated after the Cold War Russia seemingly embarked on the establishment of a democratic political system and seemed intent on joining the liberal international order However under President Putin's rule there have been dramatic shifts in Russian domestic and foreign policies in order to re-establish itself as a great power This book examines broad aspects of Russian political culture and threat perception such as Russia's reaction to NATO expansion its information warfare and energy policies and its policy towards the Global South especially the Middle East and Africa The objective of the analyses is to explain the factors that influence Russian foreign policy and to show how and why Russian relations with the European Union and the United States have deteriorated so rapidly in recent years The volume introduces an alternative approach to the standard realist perspective which often underlies existing analyses of Russian policy namely the work offers a theoretical perspective that focuses on the Russian sense of identity and on ontological security This book will be of much interest to students of Russian foreign policy security studies and International Relations

The Cure for Catastrophe Robert Muir-Wood, 2016-09-01 Hurricanes tsunamis earthquakes typhoons we watch in horror before springing into action with aid and support shocked again and again by the destructive power of the earth Except these disasters aren't only the earth's doing they are ours too Why did no one consider that a tsunami could disable the nuclear power plants in Fukushima Why did so many die when Katrina flooded New Orleans Not so long ago we could only focus on rescuing and sheltering survivors now we can anticipate many natural disasters and plan for them In dozens of cities around the world we're able to identify the specific buildings that will be shaken apart blown down or reduced to rubble Yet every year thanks to politics and inertia we fail to act Traversing continents and history Robert Muir Wood blends gripping storytelling with scientific insights to detail our efforts to tame the most extreme forces of nature At the frontlines the predictive powers of new technologies mean we can foresee a future where there is an end to the pain and destruction wrought by these devastating cataclysms As *The Cure for Catastrophe* makes clear we have an extraordinary opportunity before us to make the decisions about what we build where we live and how warnings are communicated that could save millions of lives

Taming the Wild Horse of Shadow Education Wei Zhang, 2023-05-02 Zhang analyses the phenomenon of private supplementary tutoring from a global perspective The expansion of such tutoring alongside schooling is among the striking

global shifts since the turn of the century In many countries over half of the relevant cohorts of children receive private tutoring with that proportion in some locations exceeding 80% The sector has far reaching implications for social inequalities in efficiencies in educational processes study burdens on students family finances innovation and employment Yet greatly needed government regulations have typically been slow to catch up with the phenomenon Commentary in the volume juxtaposes countries with strong regulations with counterparts having weak regulations Conceptually the book considers forces changing the roles of multiple stakeholders including governments entrepreneurs teachers families and students A useful read for students and researchers interested in comparative education and governance The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
