Demyelinating Disorders of the Central Nervous System in Childhood Dorothée Chabas, Emmanuelle L.

Waubant, 2011-03-17 Although multiple sclerosis and other disorders of myelin formation and repair are most commonly associated with adults they can also occur in infants children and adolescents Up to 5 percent of those with MS experience symptoms before the age of 18 and the number of cases diagnosed is rising There is a lack of awareness about these diseases in childhood however even amongst pediatric neurologists and MS specialists *Demyelinating Disorders of the Central Nervous System in Childhood* provides comprehensive coverage of these diseases highlighting throughout the differences between management in childhood and in adults With sections dedicated to the diagnosis course treatment and biology of pediatric MS detailed chapters on other childhood demyelinating diseases including acute disseminated encephalomyelitis optic neuritis acute complete transverse myelitis and neuromyelitis optica are also provided Essential reading for pediatric neurologists and MS specialists this book will also be valuable reading for adult neurologists and pediatricians

Elliptically Symmetric Distributions in Signal Processing and Machine Learning Jean-Pierre Delmas, Mohammed Nabil El Korso, Stefano Fortunati, Frédéric Pascal, 2024 Zusammenfassung This book constitutes a review of recent developments in the theory and practical exploitation of the elliptical model for measured data in both classical and emerging areas of signal processing It develops techniques usable in among other areas graph learning robust clustering linear shrinkage information geometry subspace based algorithm design and semiparametric and misspecified estimation The various contributions combine to show how the goal of inferring information from a set of acquired data recurrent in statistical signal processing can be achieved even when the common practical assumption of Gaussian distribution in the data is not valid The elliptical model propounded maintains the performance of its inference procedures even when that assumption fails The elliptical distribution being fully characterized by its location vector its scatter covariance matrix and its so called density generator used to describe the impulsiveness of the data is sufficiently flexible to model heterogeneous applications This book is of interest to any graduate students and academic researchers wishing to acquaint themselves with the latest research in an area of rising consequence It is also of assistance to practitioners working in data analysis wireless communications radar and image processing
