From Flood Safety to Spatial Management Emmy Bergsma,2018-07-25 This book deals with the introduction of a new type of spatial measures in flood governance In contrast to traditional safety measures that aim to provide protection against floods by building structural flood defenses such as levees and flood walls the goal of spatial measures is to reduce the exposure to flood risks by changing the spatial layout of flood prone areas By limiting developments and flood proofing buildings in areas at risk to flooding investments in structural flood defenses can be circumvented and vulnerabilities reduce World wide spatial measures are gaining attractiveness as a response strategy to increasing flood risks caused by climate change and urbanization The introduction of spatial measures in flood governance involves more than the simple development of new policies and laws Research has demonstrated that the implementation of spatial measures can have huge implications for how costs and responsibilities are divided between different levels of governance and between public and private actors

changing the whole organization behind flood governance Both for the effectiveness and for the legitimacy of spatial flood governance strategies it is important that these distributive implications are well understood This book describes the introduction of spatial measures in the context of two very different delta countries the Netherlands and the United States In the United States a spatial flood governance strategy was already developed in the mid 20th century whereas in the Netherlands a safety paradigm institutionalized over the course of the 20th century and spatial measures have only recently been introduced By analyzing the science policy interactions underlying the implementation of spatial measures in both countries this book shows how under the influence of different types of experts engineers in the Netherlands and social geographers in the United States different spatial flood management strategies emerged with different distributive implications each with its own challenges for effectiveness and legitimacy

Last Ditch House Shane Dunphy, 2007 At the end of his bestselling debut *Wednesday's Child* Shane Dunphy was burnt out and wrote of leaving his job as a child protection worker But he returned to the profession he loved and in *Last Ditch House* he revisits four more cases from his childcare days using a technique similar to the first book The narrative is set a year after *Wednesday's Child* and tells of a summer spent working with four unusual cases for a voluntary child protection group *Last Ditch House* is more complex richer and a little darker than its predecessor and Shane Dunphy has consciously given more of himself this time going into his own motivations and feelings in greater detail The cases recounted here are those of four children from very different aspects of Irish society each with a unique story to tell Once again Shane Dunphy draws on the real life experience of fifteen years working in child protection and while these events did not in reality happen concurrently he has woven them together to create a non fiction book that has the pace atmosphere and dialogue of a thriller Yet everything recounted here really happened These stories shocking heart breaking and inspiring are all true
