Alford,Suzanne Ferriss,2016-04-06 An Alternative History of Bicycles and Motorcycles Two Wheeled Transportation and Material Culture accounts for the nineteenth century creation and development of two wheeled vehicles both human powered and motorized Specifically the book focuses on the period from 1885 which saw the appearance simultaneously of the Safety bicycle and the Einspur the first motorcycle to 1920 while exploring implications for later bicycling and motorcycling We argue that invention of these vehicles rather than the product of gifted individuals should be seen as the consequence of a number of historical economic cultural and political forces that intersect so unpredictably that the notion of a genius inventor is reductive The common evolutionary model of development from the bicycle to the motorcycle oversimplifies both the technology and its origins Stripping the vehicles of all their material and cultural associations such a model fails to advance our understanding of the devices their creators and their riders Taking a contemporary vehicle and tracing its lineage creates a false sense of evolutionary necessity in its creation and fails to account for the many possible developmental paths that were for whatever reason abandoned By contrast our book adopts a material culture approach a form of inquiry that stresses the connections between artifacts and social relations We consider not simply the bicycle and motorcycle as material objects but focus also on the complex socio political and economic convergences that produced the materials materials that in turn themselves shaped the vehicles appearance function and adoption by riders **Hyperthermic Oncology from Bench to Bedside** Satoshi Kokura,Toshikazu Yoshikawa,Takeo Ohnishi,2016-06-07 This comprehensive work broadens readers understanding of the rudimentary mechanism of the anti cancer effect of hyperthermia It also presents state of the art clinical outcomes by hyperthermia treatment of cancer In the past few decades basic and clinical research have shown through in vitro experiments that hyperthermia inhibits epithelial mesenchymal transition EMT resulting in the prevention of metastasis It also has been learned that hyperthermia shows its superior benefit when applied in combination with radiation therapy chemotherapy or various immunotherapies as treatments of several types of carcinoma The chapters here from expert contributors describe the details of their research for each type of cancer This book provides not only an overview and

the current status of hyperthermia but also its future perspectives Therefore this volume will greatly benefit oncologists radiologists and radiology technologists and chemotherapists who are involved in immunotherapy for all kinds of cancer

Immunology of Psoriatic Disease Eva Reali,Nicolò Costantino Brembilla,2019-07-31 Psoriasis is a chronically relapsing inflammatory skin disorder affecting about 2% of the worldwide population The disease is associated

with important systemic manifestations including cardiovascular comorbidities and metabolic syndrome In addition about 30% of patients develop joint inflammation known as psoriatic arthritis PsA Our knowledge on the pathogenesis of psoriasis has dramatically expanded in the last decade suggesting the existence or co existence of both auto immune and auto inflammatory components Skin lesions develop from a complex interplay between keratinocytes vascular endothelium dendritic cells and T cells generating a self sustaining inflammatory cycle Within this cycle epidermal CD8 T lymphocytes specific for self antigens may represent the major autoimmune mechanism Despite the recent progress in the comprehension of the pathogenesis of psoriasis many questions remain open ranging from the plaque initiating events to the characterization of the autoimmune autoinflammatory components of the disease The mechanisms that link cutaneous psoriasis to its extra cutaneous and systemic manifestations also remain vague In this Research Topic we invited top scientists to summarize the front line research in the field of immunology of cutaneous psoriasis and its systemic and joint manifestations Our intention was to integrate the pillar concepts of psoriasis immunopathology with the most novel insights aiming at providing an advanced view of this rapidly evolving and fascinating field

Polar Auxin Transport Rujin Chen,František Baluška,2013-04-03 The importance of the plant growth regulator auxin for plant growth has long been recognized even before the discovery of its chemical structures in the early 20th century Physiological studies in the decades since have demonstrated that auxin is unidirectionally transported in plants a process dubbed polar auxin transport It is the polar auxin transport process that generates a local auxin concentration gradient and regulates a broad array of physiological and developmental processes The discoveries of auxin transport carrier proteins that mediate auxin influx into and efflux out of transport competent cells and auxin receptor proteins for auxin signaling in the last few decades represent significant milestones in auxin research and open up opportunities to probe the cellular and molecular processes that regulate auxin transport and integrate environmental cues with signaling processes Remarkably components of the polar auxin transport machinery are present in both lower plants such as mosses and higher plants including monocots and eudicots illustrating the key role of polar auxin transport in plant evolution This book highlights topics ranging from physiological and genetic studies of polar auxin transport in plant development to growth responses to the environment and plant microbe interactions to hormonal cross talks with various cellular and molecular regulatory processes essential for polar auxin transport
