

Cell phone use

The use of Mobile Communications Equipment has become increasingly important in the conduct of business and personal affairs. However, drivers must not compromise their own or others' safety when using such equipment. Mobile Communications can enhance personal safety and security when appropriately used, particularly in emergency situations. Safety must be paramount when using mobile communications equipment to avoid negating these benefits.

Mobile Communication Equipment includes, but is not limited to cellular phones, pagers, portable email devices, in-vehicle communications systems, telematics devices and portable two-way radios.

Driving while distracted can result in loss of vehicle control, accident and injury. Ford strongly recommends that drivers use extreme caution when using any device that may take their focus off the road. The drivers primary responsibility is the safe operation of their vehicle. Only use cell phones and other devices not essential to the driving task when it is safe to do so.

Stanovich, 2021-08-31 Why we don't live in a post truth society but rather a myside society what science tells us about the bias that poisons our politics In *The Bias That Divides Us* psychologist Keith Stanovich argues provocatively that we don't live in a post truth society as has been claimed but rather a myside society Our problem is not that we are unable to value and respect truth and facts but that we are unable to agree on commonly accepted truth and facts We believe that our side knows the truth Post truth That describes the other side The inevitable result is political polarization Stanovich shows what science can tell us about myside bias how common it is how to avoid it and what purposes it serves Stanovich explains that although myside bias is ubiquitous it is an outlier among cognitive biases It is unpredictable Intelligence does not inoculate against it and myside bias in one domain is not a good indicator of bias shown in any other domain Stanovich argues that because of its outlier status myside bias creates a true

blind spot among the cognitive elite those who are high in intelligence executive functioning or other valued psychological dispositions They may consider themselves unbiased and purely rational in their thinking but in fact they are just as biased as everyone else Stanovich investigates how this bias blind spot contributes to our current ideologically polarized politics connecting it to another recent trend the decline of trust in university research as a disinterested arbiter **Consumer Reports Buying Guide** Consumer Reports,2007-11 This is the 2008 edition to get help with trusted product reviews and comparisons Popular Science ,2008 Oversight on Passenger Vehicle Roof Strength United States.
