Introduction to Development Economics Marco Missaglia, Gianni Vaggi, 2025-03-21 This textbook provides an introduction to development economics that examines both the drivers of economic growth and sustainable development. It initially presents development economics within a historical and political context before widening its attention to theories of growth and development, the importance of the Sustainable Development Goals, the imbalance of power between the Global North and South, global development policies, and the role of international finance in development. Rather than focusing primarily on neoclassical growth theories, qualitative and quantitative aspects of the development process are both highlighted. This book aims to give readers a broad understanding of the economic drivers of development and the economic theories that underpin them. It will be relevant to undergraduate and postgraduate students interested in development economics and sustainable development.

Approaching Equality Roger A. McCain, 2017-05-26 Drawing on some recent research, especially that of Piketty and his associates, and on older ideas, particularly from Sir Arthur Lewis, Roger McCain proposes policies that together would aim to reverse the observed tendency towards the concentration of wealth in market economies, thus approach equality. The shortcomings and dangers of rising wealth inequality are discussed both from the point of view of increasing instability and of equalitarian values.

The effect of land inheritance on youth employment and migration decisions: Evidence from rural

Ethiopia Kosec, Katrina, Ghebru, Hosaena, Holtemeyer, Brian, Mueller, Valerie, Schmidt, Emily, 2017-03-28 In Ethiopia there are two binding forces push and pull that deserve attention when it comes to youth occupational and spatial mobility choices and the national land use and transfer policy On the one hand the fact that the land rental market in Ethiopia is supply constrained due to market and policy distortions marginalizes youth and serves as a push factor leading them to look elsewhere for a livelihood strategy On the other hand the regulatory conditions and restrictions attached to land use and inheritance rights may serve as a pull factor and force youth to be tied to the rural and or farming sector Our study thus aims to explore how youth land access both inheritance and market based affects their migration and employment decisions We explore this question in the context of rural Ethiopia using panel data from 2010 and 2014 We find that larger expected land inheritances significantly lower the likelihood of long distance permanent migration and of permanent migration to urban areas during this time Inheriting more land is also associated with a significantly higher likelihood of employment in agriculture and a lower likelihood of employment in the nonagricultural sector Conversely the decision to attend school is unaffected These results appear to be most heavily driven by males and by the older half of our youth sample We also find several mediating factors matter Land inheritance plays a much more pronounced role in predicting rural to urban permanent migration and nonagricultural sector employment in areas with less vibrant land markets and in relatively remote areas those far from major urban centers Overall the results reaffirm the notion that push factors dominate pull factors in dictating occupational and migration decisions in Ethiopia and highlight youth preferences to use migration or non agricultural employment as a last resort after exhausting other means of accessing land such as temporary land rental
