(QUESTION 6 (Start on a new page.)

A 12 kg block is initially at rest at point A at the bottom of a ROUGH inclined plane. The block is pulled up the incline by a constant force F acting parallel to the incline. The block reaches point B, which is at a vertical height of 4.0 m above the horizontal, with a speed of 3.00 m/s. See the diagram below.

- 6.1 Define the term non-conservative force.
- 6.2 Draw a labelled free-body diagram for the block when it is pulled up the incline.
- 6.3 Calculate the total work done on the block by the NON-CONSERVATIVE forces when the block moves from point A to point B. (5)

The same constant force F now moves the block at a CONSTANT VELOCITY across a rough horizontal surface from point B to point C, as shown below. Force F acts parallel to the horizontal surface.

The magnitude of the constant frictional force acting on the block while moving from point B to point C is 40 N, 40% greater than the magnitude of the constant frictional force acting on the block when it moves from point A to point B.

The Schenley Experiment Jake Oresick, 2017-04-14 The Schenley Experiment is the story of Pittsburgh's first public high school, a social incubator in a largely segregated city that was highly even improbably successful throughout its 156-year existence. Established in 1855 as Central High School and reorganized in 1916, Schenley High School was a model of innovative public education and an ongoing experiment in diversity. Its graduates include Andy Warhol, actor Bill Nunn, and jazz virtuoso Earl Hines, and its prestigious academic program and pensions lured such teachers as future Pulitzer Prize winner Willa Cather. The subject of investment as well as destructive neglect, the school reflects the history of the city of Pittsburgh and provides a study in both the best and worst of urban public education practices there and across the Rust Belt. Integrated decades before *Brown v. Board of Education*, Schenley succumbed to default segregation during the white flight of the 1970s; it rose again to prominence in the late 1980s when parents camped out in six-day-long lines to enroll their children in visionary superintendent Richard C. Wallace's reinvigorated school. Although the historic triangular building was a cornerstone of its North Oakland neighborhood and a showpiece for the city of Pittsburgh, officials closed the school in 2008, citing over \$50 million in necessary renovations, a controversial event that captured national attention. Schenley alumnus Jake Oresick tells this story through interviews, historical documents, and hundreds of first-person accounts drawn from a community indelibly tied to the school. A memorable, important work of local and educational history, his book is a case study of desegregation, magnet education, and the changing nature and legacies of America's oldest public schools.

American Military Communities in West Germany John W. Lemza, 2016-05-13 On April 28, 1946, a small group of American wives and children arrived at the port of Bremerhaven, West Germany, the first of thousands of military family members to make the trans-Atlantic journey. They were the basis of a network of military communities, Little Americas, that would spread across the postwar German landscape. During a 45-year period, which included some of the Cold War's tensest moments, their presence confirmed America's resolve to maintain Western democracy in the face of the Soviet threat. Drawing on archival sources and personal narratives, this book explores these enclaves of Americanism from the U.S. government's perspective to the grassroots view of those who made their homes in Cold War Europe. These families faced many challenges in balancing their military missions with their daily lives during a period of dynamic global change. The author describes interaction in American communities that were sometimes separated, sometimes connected, with their German neighbors.

Systemic and Non-Systemic Opposition in the Russian Federation Cameron Ross, 2016-03-03 Over the period December 2011–July 2013, a tidal wave of mass protests swept through the Russian Capital and engulfed scores of cities and regions. Civil society, it appeared, had at last woken up. This fascinating book examines the rise and fall of the non-

systemic opposition and the role of the systemic political opposition during this turbulent period. Leading experts in the field from Russia along with scholars from the UK and the US reflect on the conditions that have made large scale protests possible, the types of people who have taken part and the goals of the opposition movement at both the national and regional levels. Contributors discuss what steps the regime has taken in response to this challenge and examine the relationship between the systemic and non systemic opposition and what potential exists for the creation of a broad based opposition coalition. The role of the expanding Russian middle class is discussed along with contemporary developments among the Russian left against the backdrop of the global economic crisis. The political, social and ethnic dimensions of the protest movement are also examined at both the national and regional levels in this truly comprehensive study of the rebirth of civil society in modern Russia.

Working-Class Utopias Robert M. Fogelson, 2022-10-18. One of the nation's foremost urban historians traces the history of cooperative housing in New York City from the 1920s through the 1970s. As World War II ended and Americans turned their attention to problems at home, union leaders and other prominent New Yorkers came to believe that cooperative housing would solve the city's century old problem of providing decent housing at a reasonable cost for working class families. *Working Class Utopias* tells the story of this ambitious movement from the construction of the Amalgamated Houses after World War I to the building of Co op City, the world's largest housing cooperative, four decades later. Robert Fogelson brings to life a tumultuous era in the life of New York, drawing on a wealth of archival materials such as community newspapers, legal records and personal and institutional papers. In the early 1950s, a consortium of labor unions founded the United Housing Foundation under the visionary leadership of Abraham E. Kazan, who was supported by Nelson A. Rockefeller, Robert F. Wagner Jr and Robert Moses. With the help of the state, which provided below market rate mortgages, and the city, which granted tax abatements, Kazan's group built large scale cooperatives in every borough except Staten Island. Then came Co op City, built in the Bronx in the 1960s as a model for other cities but plagued by unforeseen fiscal problems, culminating in the longest and costliest rent strike in American history. Co op City survived but the United Housing

Foundation did not and neither did the cooperative housing movement Working Class Utopias is essential reading for anyone seeking to understand the housing problem that continues to plague New York and cities across the nation

Rough Diamonds Hendrik Snyders, 2025-08-22 Starting in the late 19th century South African baseball has established a fascinating and multi layered history Initially established by a small group of dedicated pioneers the sport benefited from the contributions of a diverse and multi national group of enthusiasts and opponents including sailors

cricketers missionaries activists businessmen and bureaucrats Established at a time of social and political segregation the South African game eventually developed into a system of legislated racism under apartheid Through its willing participation in official race based events the sport was stripped of its innocence and South Africa was formally expelled from the world game only to be readmitted in 1992 following the country's slow transition to democracy This book presents the history of South African baseball from its inception to its liberation from apartheid Based on extensive archival research this is the first integrated history of South African baseball's eventful past
