Decentralized Governance and Accountability Jonathan A. Rodden, Erik Wibbels, 2019-02-28 Reviews recent lessons about decentralized governance and implications for future development programs and policies **Report on Activities, ... December 28, 2013 to January 2, 2015, House Report 113-679, 113-2**, 2015 **Jarvis's Health Assessment and Physical Examination - E-Book** Helen Forbes, Elizabeth Watt, 2020-09-25 Increased content on screening for family violence and abuse and mental health assessment A suite of point of view videos demonstrating core health assessment techniques for some of the difficult skills and concepts related to health assessment examinations *PISA 2018 Results (Volume V) Effective Policies, Successful Schools* OECD, 2020-09-29 The OECD Programme for International Student Assessment PISA examines what students know in reading mathematics and science and what they can do with what they know this is one of six volumes that present the results of the PISA 2018 survey the seventh round of the triennial assessment Volume V Effective Policies Successful Schools analyses schools and school systems and their relationship with education outcomes more generally *Value for Money in School Education Smart Investments, Quality Outcomes, Equal Opportunities* OECD, 2022-11-29 Policymaking has always been a matter of making choices managing trade offs and balancing multiple goals and priorities to make complex budgetary decisions Yet the past few years have seen a rising number of priorities facing policymakers hence mounting pressure to enhance the efficiency of public spending *The effect of land inheritance on youth employment and migration decisions: Evidence from rural Ethiopia* Kosec, Katrina, Ghebru, Hosaena, Holtemeyer, Brian, Mueller, Valerie, Schmidt, Emily, 2017-03-28 In Ethiopia there are two binding forces push and pull that deserve attention when it comes to youth occupational and spatial mobility choices and the national land use and transfer policy On the one hand the fact that the land rental market in Ethiopia is supply constrained due to market and policy distortions marginalizes youth and serves as a push factor leading them to look elsewhere for a livelihood strategy On the other hand the regulatory conditions and restrictions attached to land use and inheritance rights may serve as a pull factor and force youth to be tied to the rural and or farming sector Our study thus aims to explore how youth land access both inheritance and market based affects their migration and employment decisions We explore this question in the context of rural Ethiopia using panel data from 2010 and 2014 We find that larger expected land inheritances significantly lower the likelihood of long distance permanent migration and of permanent migration to urban areas during this time Inheriting more land is also associated with a significantly higher likelihood of employment in agriculture and a lower

likelihood of employment in the nonagricultural sector Conversely the decision to attend school is unaffected These results appear to be most heavily driven by males and by the older half of our youth sample We also find several mediating factors matter Land inheritance plays a much more pronounced role in predicting rural to urban permanent migration and nonagricultural sector employment in areas with less vibrant land markets and in relatively remote areas those far from major urban centers Overall the results reaffirm the notion that push factors dominate pull factors in dictating occupational and migration decisions in Ethiopia and highlight youth preferences to use migration or non agricultural employment as a last resort after exhausting other means of accessing land such as temporary land rental

South African Schooling: The Enigma of Inequality Nic Spaull,Jonathan D. Jansen,2019-11-05 This volume brings together many of South Africa s leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90 10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people s future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI

Bounded Rationality in Decision Making Under Uncertainty: Towards Optimal Granularity Joe Lorkowski,Vladik Kreinovich,2017-07-01 This book addresses an intriguing question are our decisions rational It explains seemingly irrational

human decision making behavior by taking into account our limited ability to process information. It also shows, with several examples, that optimization under granularity restriction leads to observed human decision making. Drawing on the Nobel prize winning studies by Kahneman and Tversky, researchers have found many examples of seemingly irrational decisions, e.g., we overestimate the probability of rare events. Our explanation is that since human abilities to process information are limited, we operate not with the exact values of relevant quantities but with granules that contain these values. We show that optimization under such granularity indeed leads to observed human behavior. In particular, for the first time, we explain the mysterious empirical dependence of betting odds on actual probabilities. This book can be recommended to all students interested in human decision making, to researchers whose work involves human decisions, and to practitioners who design and employ systems involving human decision making so that they can better utilize our ability to make decisions under uncertainty.
