Building Inclusive Education in K-12 Classrooms and Higher Education: Theories and Principles Koreeda, Kiyoji, Tsuge, Masayoshi, Ikuta, Shigeru, Dalton, Elizabeth Minchin, Ewe, Linda Plantin, 2023-06-12 Most people recognize the importance of inclusive education and hope to promote it everywhere at all levels and situations in education. However, the road to realizing this ideal is by no means a smooth one due to this further study is required. *Building Inclusive Education in K-12 Classrooms and Higher Education: Theories and Principles* discusses various inclusive practices in K-12 classrooms and higher education all over the world and presents problems and challenges that educators are struggling to overcome. Covering key topics such as educational technology, global movement, and inclusive education, this major reference work is ideal for administrators, policymakers, industry professionals, researchers, academicians, scholars, practitioners, instructors, and students.

Going Beyond the Traditional Tools of Implementation Science Kristin Thomas, Per Nilsen, Jeanette Kirk, 2024-01-08 **Human Factors in Effective Counter-Terrorism** Richard Warnes, 2024-02-29 This book seeks to provide a comparative assessment of the significance of human factors in effective counterterrorism. The phrase human factors is used to describe personal relationships, individual capabilities, effective leadership, technical interface, organisational culture, and the community engagement necessary to effectively minimise and control the threat of terrorism. Unlike many works in the field, this book is constructed around the input of experienced knowledge from over 170 semi-structured interviews of specialist military, policing, intelligence, and security practitioners, those actors actually involved in countering terrorism. These practitioners come from seven countries: the United Kingdom, Ireland, France, Spain, Israel, Turkey, and the United States, all of which have suffered over the years from different types of terrorist threat and responded with a mixture of counterterrorist measures. Where military practitioners also discussed overseas counterinsurgency measures, that material has been included since terrorism forms a key aspect of such wider insurgencies. The resulting interview data was analysed through a variant of Grounded Theory to identify key emerging themes and issues, both positive and negative, relevant to human factors in the individual countries and more generically. This book incorporates the informed operational experiences and insights of the interviewees while seeking to provide examples of successful counterterrorist measures at the strategic, operational, and tactical levels. This book will be of much interest to students of counterterrorism, defence studies, and security studies in general.

Trust-Based Observations Craig Randall, 2020-07-30 The results of observations are not improving teaching and learning. Pertinently, the Gates Foundation's recently completed effort to improve student outcomes through enhancing the teacher evaluation process failed to achieve substantive improvement. The way observations are currently designed serve as an obstacle to teacher risk-taking. Teachers fear negative evaluations when their pedagogy is rated and they lack faith in being supported by supervisors because a trusting relationship between them and their observer has not been built. *Trust-Based Observations: Maximizing Teaching and Learning Growth* is a schema-changing evaluation model that

understands people perform at their best when they feel safe and supported It begins with twelve 20 minute observations per week followed by collegial conversations driven by reflective questions sharing observed teaching strengths and the building of safe and trusting relationships with teachers Add the elimination of rating pedagogical skills and replace it with rating mindset and teachers trust When teachers fully embrace risk taking and innovation it leads to remarkable teaching transformations and improved student learning *Congressional Record* United States.
