Franz, 2024 A Linguistically Inclusive Approach to Grading Writing A Practical Guide provides concrete tools for college writing instructors to improve their grading and feedback practices to benefit all student writers A linguistically inclusive grading approach honors Black linguistic justice facilitates students use of feedback and guides students to make rhetorical linguistic choices The existing literature addresses inclusive writing assessment from a programmatic and class policy level e g Inoue 2015 Perryman Clark 2012 Meanwhile this book provides models of actual comments on student writing to help instructors develop the necessary skills to incorporate inclusive assessment and feedback into their everyday practice The book details how to respond to organization word choice grammar and mechanics rooted in African American English and other language varieties A linguistically inclusive approach to grading writing will benefit instructors across contexts including instructors who teach online teach high achieving students or use contract grading The book s example comments and practices can also be implemented by instructors constrained by mandated grade weighting or rubrics that preclude adopting more extensive changes A linguistically inclusive grading approach is grounded

in theory and research across education composition and sociolinguistics Demystifying Academic Writing in Higher Education: A Process View on Academic Textual Production Xinghua Liu, Rui Alexandre Alves, Angelique Aitken, Josef Schmied, 2025-10-30 Academic writing in this Research Topic refers to the type of writing demonstrating students disciplinary knowledge of and proficiency in synthesizing analyzing and responding critically to new information Hyland 2004 Swales 1990 which may include those genres like course essays project reports research proposals lab notes journal articles conference paper theses and dissertations As the current workplaces have become increasingly specialized higher education worldwide has been increasingly charged with the task of developing students academic writing and correspondingly on students parts learning through writing has been necessary for them to succeed in higher education To prepare university students for writing challenges during the past decades numerous studies have been devoted to the study of linguistic and rhetorical resources in students academic writing under such umbrella terms like style reader awareness authorial voice writers identity stance evaluation textual structures steps and moves Charles Hunston Hinkel 2002 However previous research on academic writing has been predominantly focused on the linguistic and rhetorical aspects namely the final product of students writing while the nature and processes of composition students engagement and individual differences and the influence of contextual factors like emerging technology have been under explored Thus the goal of this Research Topic is to bring a process oriented and dynamic perspective to the study of textual production in academic contexts by both encouraging an expanded view of existing research paradigms and also welcoming novel approaches Data can be collected by using corpus building interviews and questionnaires but we would also welcome the use of experimental methods and a mixed method approach for data collection Meanwhile previous research mainly studied university students who were learning English as a second or foreign language hence we also welcome research examining first language writers and students who are learning a second or foreign language other than English We believe for the study of the complex phenomenon like academic writing no single method or tool can suffice Therefore we strongly recommend a more creative perspective in data collection and analyzing and interpreting academic writing Papers can present quantitative data analyses based on experimental design or qualitative data analyses stemmed from more ethnographic oriented research Systematic review studies are also welcome We encourage contributions related but not restricted to the following topics 1 Cognitive processes in academic texts planning composing and revisions and student writers individual differences 2 Metacognition and self regulation in academic texts planning composing and revisions and student writers individual differences 3 Motivation and self efficacy in academic texts planning composing and revisions and student writers individual differences 4 Linguistic and rhetorical choices identity construction and disciplinary knowledge construction 5 Student writers textual production peer feedback and interactions with discourse communities 6 Affordances and challenges of artificial intelligence AI in the process of academic textual production in higher education Life-writing in the History of Archaeology Gabriel

Moshenska, Clare Lewis, 2023-07-10 Life writing is a vital part of the history of archaeology and a growing field of scholarship within the discipline The lives of archaeologists are entangled with histories of museums and collections developments in science and scholarship and narratives of nationalism and colonialism into the present In recent years life writing has played an important role in the surge of new research in the history of archaeology including ground breaking studies of discipline formation institutionalisation and social and intellectual networks Sources such as diaries wills film and the growing body of digital records are powerful tools for highlighting the contributions of hitherto marginalised archaeological lives including many pioneering women hired labourers and other hidden hands This book brings together critical perspectives on life writing in the history of archaeology from leading figures in the field These include studies of archive formation and use the concept of dig writing as a distinctive genre of archaeological creativity and reviews of new sources for already well known lives Several chapters reflect on the experience of life writing review the historiography of the field and assess the intellectual value and significance of life writing as a genre Together they work to problematise underlying assumptions about this genre foregrounding methodology social theory ethics and other practice focused frameworks in conscious tension with previous practices

The Missing

Course David Gooblar, 2019-08-20 What a delight to read David Gooblar's book on teaching and learning. He wraps important insights into a story of discovery and adventure. Ken Bain, author of *What the Best College Teachers Do*, says college is changing but the way we train academics is not. Most professors are taught to be researchers first and teachers a distant second, even as scholars are increasingly expected to excel in the classroom. There has been a revolution in teaching and learning over the past generation, and we now have a whole new understanding of how the brain works and how students learn. *The Missing Course* offers a field guide to the state of the art in teaching and learning and is packed with insights to help students learn in any discipline. Wary of the folk wisdom of the faculty lounge, David Gooblar builds his lessons on the newest findings and years of experience. From active learning strategies to ways of designing courses to get students talking, *The Missing Course* walks you through the fundamentals of the student-centered classroom, one in which the measure of success is not how well you lecture but how much your students actually learn. Warm and empirically based, comprehensive but accessible, student-centered and also scientific. We're so lucky to have Gooblar as a guide. Sarah Rose Cavanagh, author of *The Spark of Learning*, goes beyond critique, offering a series of activities, approaches, and strategies that instructors can implement. His wise and necessary book is a long defense of the idea that a university can be a site of the transformation of self and society. Los Angeles Review of Books. An invaluable source of insight and wisdom on what it means to work with students. We've needed this book for a long time. John Warner, author of *Why They Can't Write*.

Writing Instruction Across the Disciplines

Steve Graham, Carol Booth Olson, Tanya Baker, Huy Q. Chung, Undarmaa Maamuujav, Jacob Steiss, 2025-12-05 This book translates the best current research on adolescent writing instruction into teacher-friendly practices that are easy to implement in today's diverse classrooms. Leading experts present instructional methods that are applicable across the curriculum as well as specific proven techniques to build writing skills and promote critical thinking in English language arts, social studies, science, and math. Key chapters address multimodal writing and pedagogical uses of generative artificial intelligence (AI). Other essential topics include self-regulated strategy development, culturally sustaining writing practices, writing for college readiness, and teaching argument writing. Guiding Questions, Action Steps, and helpful classroom examples in each chapter enhance the book's utility as a teacher resource and course text.

Trends in Teaching Experimentation in the Life Sciences Nancy J. Pelaez, Stephanie M. Gardner, Trevor R. Anderson, 2022-05-11 This book is a guide for educators on how to develop and evaluate evidence-based strategies for teaching biological experimentation to thereby improve existing and develop new curricula. It unveils the flawed assumptions made at the classroom, department, and institutional level about what students are learning and what help they might need to develop competence in biological experimentation. Specific case studies illustrate a comprehensive list of key scientific competencies that unpack what it means to be a competent experimental life scientist. It includes explicit evidence-based guidelines for educators regarding the teaching, learning, and assessment of biological research competencies. The book also provides practical teacher guides and exemplars of

assignments and assessments It contains a complete analysis of the variety of tools developed thus far to assess learning in this domain This book contributes to the growth of public understanding of biological issues including scientific literacy and the crucial importance of evidence based decision making around public policy It will be beneficial to life science instructors biology education researchers and science administrators who aim to improve teaching in life science departments Chapters 6 12 14 and 22 are available open access under a Creative Commons Attribution 4 0 International License via link [springer.com](https://link.springer.com)
