

TOPIC 1: MECHANICS – PROJECTILE MOTION

Learner Note: Always draw a diagram of the situation and enter all the numerical values onto your diagram. Remember to **SELECT A DIRECTION AS POSITIVE OR NEGATIVE**.

SECTION A: TYPICAL EXAM QUESTIONS**QUESTION 1: 6 minutes**

(Taken from the WC Prelim. paper 2008)

A cross-bow (bow and arrow) is used to shoot an arrow vertically upwards into the air from the top of an 80 m high platform. The arrow reaches a height of 15 m above the platform and then falls to the ground below. Ignore the effects of air friction.

- 1.1 Calculate the magnitude of the velocity of the arrow at the instant it is shot up into the air from the top of the platform. (4)
- 1.2 Calculate the time it takes for the arrow to reach the ground from the moment it is shot upwards (4)

Methodologies of Pattern Recognition Satoshi Watanabe,2014-05-12 Methodologies of Pattern Recognition is a collection of papers that deals with the two approaches to pattern recognition geometrical and structural the Robbins Monro procedures and the implications of interactive graphic computers for pattern recognition methodology Some papers describe non supervised learning in statistical pattern recognition parallel computation in pattern recognition and statistical analysis as a tool to make patterns emerge from data One paper points out the importance of cluster processing in visual perception in which proximate points of similar brightness values form clusters At higher levels of mental activity humans are efficient in clumping complex items into clusters Another paper suggests a recognition method which combines versatility and an efficient noise proofness in dealing with the two main problems in the field of recognition These difficulties are the presence of a large variety of observed signals and the presence of interference One paper reports on a possible feature selection for pattern recognition systems employing the minimization of population entropy Electronic engineers physicists physiologists psychologists logicians mathematicians and philosophers will find great rewards in reading the above collection

Hyperbolic Partial Differential Equations Matthew Witten,2014-05-23 Hyperbolic Partial Differential Equations III is a refereed journal issue that explores the applications theory and or applied methods related to hyperbolic partial differential equations or problems arising out of hyperbolic partial differential equations in any area of research This journal issue is interested in all types of articles in terms of review mini monograph standard study or short communication Some studies presented in this journal include discretization of ideal fluid dynamics in the Eulerian representation a Riemann problem in gas dynamics with bifurcation periodic McKendrick equations for age structured population growth and logistic models of structured population growth A number of book reviews are also included This journal provides an interdisciplinary forum for the presentation of results not included in other particular journals and thus will be beneficial to those interested in this field of study

Gravity Eric Poisson,Clifford M. Will,2014-05-29 This textbook explores approximate solutions to general relativity and their consequences It offers a unique presentation of Einstein s theory by developing powerful methods that can be applied to astrophysical systems Beginning with a uniquely thorough treatment of Newtonian gravity the book develops post Newtonian and post Minkowskian approximation methods to obtain weak field solutions to the Einstein field equations The book explores the motion of self gravitating bodies the physics of gravitational waves and the impact of radiative losses on gravitating systems It concludes with a brief overview of alternative theories of gravity Ideal for graduate courses on general relativity and relativistic astrophysics the book examines real life applications such as planetary motion around the Sun the timing of binary pulsars and gravitational waves emitted by binary black holes Text boxes explore related

topics and provide historical context and over 100 exercises present challenging tests of the material covered in the main text Life Henry R. Luce, 1939-10

Unveiling the Energy of Verbal Artistry: An Emotional Sojourn through **2014 Physics Grade 1memorandum Final Exams**
