2014 Final Exemplar Question Paper Of Life Orientation Grade 12:

Students at Risk of School Failure José Jesús Gázquez, José Carlos Núñez, 2018-10-18 The main objective of this Research Topic is to determine the conditions that place students at risk of school failure identifying student and context variables In spite of the fact that there is currently little doubt about how one learns and how to teach in some countries of the developed world there is still there is a high rate of school failure Although the term school failure is a very complex construct insofar as its causes consequences and development from the field of educational psychology the construct student engagement has recently gained special interest in an attempt to deal with the serious problem of school failure School engagement builds on the anatomy of the students involvement in school and describes their feelings behaviors and thoughts about their school experiences So engagement is an important component of students school experience with a close relationship to achievement and school failure Children who self set academic goals attend school regularly and on time behave well in class complete their homework and study at home are likely to interact adequately with the school social and physical environments and perform well in school In contrast children who miss school are more likely to display disruptive behaviors in class miss homework frequently exhibit violent behaviors on the playground fail subjects be retained and if the behaviors persist quit school Moreover engagement should also be considered as an important school outcome eliciting more or less supportive reactions from educators For example children who display school engaged behaviors are likely to receive motivational and instructional support from their teachers The opposite may also be true But what makes student engage more or less The relevant literature indicates that personal variables e g sensory motor neurodevelopmental cognitive motivational emotional behavior problems learning difficulties addictions social and or cultural variables e g negative family conditions child abuse cultural deprivation ethnic conditions immigration or school variables e g coexistence at school bullying cyberbullying may concurrently hinder engagement preventing the student from acquiring the learnings in the same conditions as the rest of the classmates *The State of the Art in Creative Arts Therapies* Tal Shafir, Hod Orkibi, Felicity Anne Baker, David Gussak, Girija Kaimal, 2020-07-08 This eBook is a collection of articles from a Frontiers Research Topic Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series they are collections of at least ten articles all centered on a particular subject With their unique mix of varied contributions from Original Research to Review Articles Frontiers Research Topics unify the most influential researchers the latest key findings and historical advances in a hot research area Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office frontiersin.org about contact *Advances in Research on Age in the Workplace and Retirement* Cort W. Rudolph, Hannes Zacher, Susanne Scheibe, 2018-01-16 Shifts in the age composition of the workforce coupled with dynamic definitions of retirement represent important issues that influence work processes and more generally the experience of working across one's career For example redefinitions of careers and the changing nature of working have

contributed to the emergence of distinct forms and patterns of work experiences across the prototypical work lifespan Likewise older individuals are increasingly delaying retirement in favor of longer term labor force participation The study of age and work and work and retirement by industrial work and organizational IWO psychologists and scholars of human resources management and organizational behavior HR OB has recently proliferated in part as a result of such trends along with the recognition that age related processes are important indicators of various proximal e g job attitudes work behaviors work motives and wellbeing and distal outcomes e g sustainable employability climates for aging and firm performance at various levels of abstraction in modern work environments Recent theoretical advances have suggested that age along with individual psychological factors and various contextual influences can jointly influence work outcomes that contribute to long term employment success including work performance job attitudes work orientations and motivations Similar theoretical developments concerning retirement have postulated individual and contextual elements that drive success in the transition from career and work roles to non work and leisure as well as post retirement bridge employment roles In this Research Topic we aim to curate a collection of papers that are representative of current trends and advances in thinking about and investigating the role of age in workplace processes and the changing nature of retirement Our hope is to showcase various contemporary ideas and rigorous empirical studies as a means to inform broader thinking and to support enhanced theorizing and organizational practice regarding these processes
