Brazilian Geography Rubén C. Lois González, Marco Antonio Mitidiero Junior, 2022-11-28 This book presents the history and theoretical contributions of Brazilian geography since the late twentieth century and shows how this sphere of knowledge has been organically integrated with social and territorial issues and with social movements The relationship between the subjects and objects of research in Brazilian geography has been centred on the understanding and transformation of realities marked by injustice and inequality Against this backdrop the geography of the country has developed by integrating relating to and forming part of those realities as it headed out into the streets Brazilian geography continues to hold theoretical debate in high regard as a result of the influence of critical theory This book thus covers the theoretical approaches in Brazilian geography its different lines of research and above all its character as manifested in culture and society

Handbook on the Geographies of Power Mat Coleman, John Agnew, 2018-07-27 The so called spatial turn in the social sciences means that many researchers have become much more interested in what can be called the spatialities of power or the ways in which power as a medium for achieving goals is related to where it takes place Most famous authors on the subject such as Machiavelli and Hobbes saw power as entirely equivalent to domination exercised by some over others Though this meaning is hardly redundant understandings of power have become more multidimensional and nuanced as a result of the spatial turn Much recent writing in human geography for example has rigorously extended use of the term power beyond its typical understanding as a resource that pools up in some hands and some places to a medium of agency that has different effects depending on how it is deployed across space and how actors cooperate or not to give it effect To address this objective the book is organized thematically into four sections that cover the main areas in which much of the contemporary work on geographies of power is concentrated bodies economy environment and energy and war
