GENERAL LUBRICATIONS

Lubricate every 2 months (1,000 km, 600 miles)

Proper lubrication is important for smooth operation and long life of each working part of your vehicle and also for safe riding. It is a good practice to lubricate the machine after every rough ride and after getting it wet in the rain or after washing it. Major lubrication points are indicated below.

- 1 Lubricate exposed parts which are subject to rust with motor oil or grease.
- 2 Before lubricating each part, clean off any rusty scale and wipe off old grease, oil, dirt or grime.

WARNING:

Be careful not to apply too much grease to the brake disc. If grease gets on the disc, brake stop power will weaken.
