Applied and Industrial Mathematics, Venice—2, 1998 Renato Spigler, 2012-12-06 In this volume I have collected several papers which were presented at the international conference called Venice 2 Symposium on Applied and Industrial Mathematics. Such a conference was held in Venice Italy between June 11 and 16 1998 and was intended as the follow up of the very successful similar event called Venice 1 Symposium on Applied and Industrial Mathematics that was also organized in Venice in October 1989. The Venice 1 conference ended up with a Kluwer volume like this one. I am grateful to Kluwer for having accepted to publish the present volume the aim of which is to update somehow the state of the art in the field of Applied Mathematics as well as in that of the nowadays rather more developed area of Industrial Mathematics. The most of the invited key note speakers contributed to this volume with a paper related to their talk. There are in addition a few significant contributed papers selected on the basis of their quality and relevance to the present time research activities. The topics considered in the conference range from rather general subjects in applied and numerical analysis to more specialized subjects such as polymers and disordered media granular flow semiconductor mathematics superconductors elasticity tomography and other inverse problems financial modeling photographic sciences etc. The papers collected in this volume provide a selection of them. It is clear from the previous list that some attention has been paid to relatively new and emerging fields.

Numerical Computations: Theory and Algorithms Yaroslav D. Sergeyev, Dmitri E. Kvasov, 2020-02-13 The two volume set LNCS 11973 and 11974 constitute revised selected papers from the Third International Conference on Numerical Computations Theory and Algorithms NUMTA 2019 held in Crotone Italy in June 2019. This volume LNCS 11974 consists of 19 full and 32 short papers chosen among regular papers presented at the the Conference including also the paper of the winner Lorenzo Fiaschi Pisa Italy of The Springer Young Researcher Prize for the best NUMTA 2019 presentation made by a young scientist. The papers in part II explore the advanced research developments in such interconnected fields as local and global optimization machine learning approximation and differential equations. A special focus is given to advanced ideas related to methods and applications using emerging computational paradigms.
