

Reaction Rate

- The speed of a chemical reaction = **reaction rate**
- It is defined as the change in the amount (or concentration) of the reactants or products over a range of time.
- It is often expressed in the units of molarity per second (M/s).

The rate of reaction $A \rightarrow B$ shows that as time passes, the amount of A decreases while the amount of B increases.

Well Worth Saving Laurel Leff,2019-12-03 A harrowing account of the profoundly consequential decisions American universities made about refugee scholars from Nazi dominated Europe The United States role in saving Europe s intellectual elite from the Nazis is often told as a tale of triumph which in many ways it was America welcomed Albert Einstein and Enrico Fermi Hannah Arendt and Herbert Marcuse Rudolf Carnap and Richard Courant among hundreds of other physicists philosophers mathematicians historians chemists and linguists who transformed the American academy Yet for every scholar who survived and thrived many many more did not To be hired by an American university a refugee scholar had to be world class and well connected not too old and not too young not too right and not too left and most important not too Jewish Those who were unable to flee were left to face the horrors of the Holocaust In this rigorously researched book Laurel Leff rescues from obscurity scholars who were deemed not worth saving and tells the riveting full story of the hiring decisions universities made during the Nazi era Provided by publisher **Scientific and Technical Aerospace Reports** ,1991 *Science for the people: a memorandum* Thomas Twining,1870
