Privacy in the Digital Age Nancy S. Lind, Erik T. Rankin, 2015-06-19 A collection of expert essays examines the privacy rights that have been lost in the post 9 11 era giving students and others the knowledge they need to take back their constitutional protections This timely two volume collection shares information every citizen should have tackling the erosion of privacy rights engendered by the ability of digital

technology to intercept and store personal data most often without the knowledge of those being monitored. Examining its subject through the lens of Fourth Amendment rights, the work focuses on technological advances that now gather personal data on an unprecedented scale, whether by monitoring social media, tracking cell phones, or using thermal imaging to watch people's movement. It also examines the possible impact of the widespread gathering of such data by law enforcement and security agencies and by private corporations such as Google. Organized by hot button topics confronting U.S. citizens in the post 9/11 era, the work reviews the original intent of the Fourth Amendment and then traces the development and erosion of interpretations of that amendment in the 21st century. Topical essays offer a comprehensive treatment and understanding of current Fourth Amendment issues, including those that have been brought before the courts and those relative to the continuing governmental and societal emphasis on security and public safety since the Columbine shootings in 1999 and the events of September 11, 2001.

L'ouvrage dresse un panorama des grandes évolutions liées aux technologies et montre leurs impacts pour les organisations et les individus de manière générale et les ETI et PME en particulier. La méthode des 6 C conçue et mise en œuvre par l'auteur depuis 15 ans. Cette approche est structurée de la façon suivante : Comprendre, c'est la phase diagnostique de tout projet stratégique incluant une dimension digitale. Choisir, définir les orientations, objectifs et initiatives de la stratégie digitale. Concevoir, structurer et déployer le projet stratégique au plan organisationnel et technologique pour une expérience digitale optimale. Convertir, réaliser la promotion du projet en présentant les nombreux leviers digitaux existants pour générer de la valeur ajoutée. Changer, conduire la transformation digitale de l'entreprise. Affective Politics of Digital Media Megan Boler, Elizabeth Davis, 2020-09-02. This interdisciplinary international collection examines how sophisticated digital practices and technologies exploit and capitalize on emotions with particular focus on how social media are used to exacerbate social conflicts surrounding racism, misogyny, and nationalism. Radically expanding the study of media and political communications, this book bridges humanities and social sciences to explore affective information economies and how emotions are being weaponized within mediatized political landscapes. The chapters cover a wide range of topics: how clickbait, fake news, and right-wing actors deploy and weaponize emotion; new theoretical directions for understanding affect algorithms and public spheres; and how the wedding of big data and behavioral science enables new frontiers of propaganda as seen in the Cambridge Analytica and Facebook scandal. The collection includes original interviews with luminary media scholars and journalists. The book features contributions from established and emerging scholars of communications, media studies, affect theory, journalism, policy studies, gender studies, and critical race studies to address

questions of concern to scholars journalists and students in these fields and beyond
