Monika Krause,2021-09-03 In *Model Cases* Monika Krause asks about the concrete material research objects behind shared
conversations about classes of objects periods and regions in the social sciences and humanities It is well known that
biologists focus on particular organisms such as mice fruit flies or particular viruses when they study general questions about
life development and disease Krause shows that scholars in the social sciences and humanities also draw on some cases more
than others selecting research objects influenced by a range of ideological but also mundane factors such as convenience
historicist ideas about development over time schemas in the general population and schemas particular to specific scholarly
communities Some research objects are studied repeatedly and shape our understanding of more general ideas in
disproportionate ways The French Revolution has profoundly influenced our concepts of revolution of citizenship and of
political modernity just like studies of doctors have set the agenda for research on the professions Based on an extensive
analysis of the role of model cases in different fields Krause argues that they can be useful for scholarly communities if they
are acknowledged and reflected as particular objects she also highlights the importance of research strategies based on
neglected research objects and neglected combinations of research objects and scholarly concerns *Cicero pro Milone, ed.*
