            if clr = '1' then reg <= "000";
            elsif cnt = '1' then
                case reg is

                    when "010" => reg <= "110";
                    when "110" => reg <= "111";
                    when "111" => reg <= "101";
                    when "101" => reg <= "100";

                    when others => reg <= "000";
                end case;
            end if;
        end if;
    end process;
    q <= reg;
end gray_cnt_arch;
```

- Case statement allows compact expression of alternatives.
 - » others clause specifies action when no other alternative applies
 - » needed here due to non-binary values of STD_LOGIC
- Note that synthesis tool generates all the *next-state* logic.
